BASIS FOR CONCLUSIONS
DISSenting Opinion

Hong Kong Accounting Standard 7 Statement of Cash Flows (HKAS 7) is set out in paragraphs 1-60. All the paragraphs have equal authority. HKAS 7 should be read in the context of its objective and the Basis for Conclusions, the Preface to Hong Kong Financial Reporting Standards and the Conceptual Framework for Financial Reporting. HKAS 8 Accounting Policies, Changes in Accounting Estimates and Errors provides a basis for selecting and applying accounting policies in the absence of explicit guidance.
Objective

Information about the cash flows of an entity is useful in providing users of financial statements with a basis to assess the ability of the entity to generate cash and cash equivalents and the needs of the entity to utilise those cash flows. The economic decisions that are taken by users require an evaluation of the ability of an entity to generate cash and cash equivalents and the timing and certainty of their generation.

The objective of this Standard is to require the provision of information about the historical changes in cash and cash equivalents of an entity by means of a statement of cash flows which classifies cash flows during the period from operating, investing and financing activities.

Scope

1. An entity shall prepare a statement of cash flows in accordance with the requirements of this Standard and shall present it as an integral part of its financial statements for each period for which financial statements are presented.

3. Users of an entity's financial statements are interested in how the entity generates and uses cash and cash equivalents. This is the case regardless of the nature of the entity's activities and irrespective of whether cash can be viewed as the product of the entity, as may be the case with a financial institution. Entities need cash for essentially the same reasons however different their principal revenue-producing activities might be. They need cash to conduct their operations, to pay their obligations, and to provide returns to their investors. Accordingly, this Standard requires all entities to present a statement of cash flows.

Benefits of cash flow information

4. A statement of cash flows, when used in conjunction with the rest of the financial statements, provides information that enables users to evaluate the changes in net assets of an entity, its financial structure (including its liquidity and solvency) and its ability to affect the amounts and timing of cash flows in order to adapt to changing circumstances and opportunities. Cash flow information is useful in assessing the ability of the entity to generate cash and cash equivalents and enables users to develop models to assess and compare the present value of the future cash flows of different entities. It also enhances the comparability of the reporting of operating performance by different entities because it eliminates the effects of using different accounting treatments for the same transactions and events.

5. Historical cash flow information is often used as an indicator of the amount, timing and certainty of future cash flows. It is also useful in checking the accuracy of past assessments of future cash flows and in examining the relationship between profitability and net cash flow and the impact of changing prices.

Definitions

6. The following terms are used in this Standard with the meanings specified:

Cash comprises cash on hand and demand deposits.

Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.
Cash flows are inflows and outflows of cash and cash equivalents.

Operating activities are the principal revenue-producing activities of the entity and other activities that are not investing or financing activities.

Investing activities are the acquisition and disposal of long-term assets and other investments not included in cash equivalents.

Financing activities are activities that result in changes in the size and composition of the contributed equity and borrowings of the entity.

Cash and cash equivalents

Cash equivalents are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes. For an investment to qualify as a cash equivalent it must be readily convertible to a known amount of cash and be subject to an insignificant risk of changes in value. Therefore, an investment normally qualifies as a cash equivalent only when it has a short maturity of, say, three months or less from the date of acquisition. Equity investments are excluded from cash equivalents unless they are, in substance, cash equivalents, for example in the case of preferred shares acquired within a short period of their maturity and with a specified redemption date.

Bank borrowings are generally considered to be financing activities. However, in some countries, bank overdrafts which are repayable on demand form an integral part of an entity's cash management. In these circumstances, bank overdrafts are included as a component of cash and cash equivalents. A characteristic of such banking arrangements is that the bank balance often fluctuates from being positive to overdrawn.

Cash flows exclude movements between items that constitute cash or cash equivalents because these components are part of the cash management of an entity rather than part of its operating, investing and financing activities. Cash management includes the investment of excess cash in cash equivalents.

Presentation of a statement of cash flows

The statement of cash flows shall report cash flows during the period classified by operating, investing and financing activities.

An entity presents its cash flows from operating, investing and financing activities in a manner which is most appropriate to its business. Classification by activity provides information that allows users to assess the impact of those activities on the financial position of the entity and the amount of its cash and cash equivalents. This information may also be used to evaluate the relationships among those activities.

A single transaction may include cash flows that are classified differently. For example, when the cash repayment of a loan includes both interest and capital, the interest element may be classified as an operating activity and the capital element is classified as a financing activity.

Operating activities

The amount of cash flows arising from operating activities is a key indicator of the extent to which the operations of the entity have generated sufficient cash flows to repay loans, maintain the operating capability of the entity, pay dividends and make new investments without recourse to external sources of financing. Information about the specific components of historical operating cash flows is useful, in conjunction with other information, in forecasting future operating cash flows.

Cash flows from operating activities are primarily derived from the principal revenue-producing activities of the entity. Therefore, they generally result from the transactions and other events that enter into the determination of profit or loss. Examples of cash flows from operating activities are:

(a) cash receipts from the sale of goods and the rendering of services;
(b) cash receipts from royalties, fees, commissions and other revenue;
HKAS 7 (December 2004 - January 2010)

(c) cash payments to suppliers for goods and services;
(d) cash payments to and on behalf of employees;
(e) cash receipts and cash payments of an insurance entity for premiums and claims, annuities and other policy benefits;
(f) cash payments or refunds of income taxes unless they can be specifically identified with financing and investing activities; and
(g) cash receipts and payments from contracts held for dealing or trading purposes.

Some transactions, such as the sale of an item of plant, may give rise to a gain or loss which that is included in the determination of recognised profit or loss. However, the cash flows relating to such transactions are cash flows from investing activities. However, cash payments to manufacture or acquire assets held for rental to others and subsequently held for sale as described in paragraph 68A of HKAS 16 Property, Plant and Equipment are cash flows from operating activities. The cash receipts from rents and subsequent sales of such assets are also cash flows from operating activities.

15 An entity may hold securities and loans for dealing or trading purposes, in which case they are similar to inventory acquired specifically for resale. Therefore, cash flows arising from the purchase and sale of dealing or trading securities are classified as operating activities. Similarly, cash advances and loans made by financial institutions are usually classified as operating activities since they relate to the main revenue-producing activity of that entity.

Investing activities

16* The separate disclosure of cash flows arising from investing activities is important because the cash flows represent the extent to which expenditures have been made for resources intended to generate future income and cash flows. Only expenditures that result in a recognised asset in the statement of financial position are eligible for classification as investing activities. Examples of cash flows arising from investing activities are:

(a) cash payments to acquire property, plant and equipment, intangibles and other long-term assets. These payments include those relating to capitalised development costs and self-constructed property, plant and equipment;
(b) cash receipts from sales of property, plant and equipment, intangibles and other long-term assets;
(c) cash payments to acquire equity or debt instruments of other entities and interests in joint ventures (other than payments for those instruments considered to be cash equivalents or those held for dealing or trading purposes);
(d) cash receipts from sales of equity or debt instruments of other entities and interests in joint ventures (other than receipts for those instruments considered to be cash equivalents and those held for dealing or trading purposes);
(e) cash advances and loans made to other parties (other than advances and loans made by a financial institution);
(f) cash receipts from the repayment of advances and loans made to other parties (other than advances and loans of a financial institution);
(g) cash payments for futures contracts, forward contracts, option contracts and swap contracts except when the contracts are held for dealing or trading purposes, or the payments are classified as financing activities; and
(h) cash receipts from futures contracts, forward contracts, option contracts and swap contracts except when the contracts are held for dealing or trading purposes, or the receipts are classified as financing activities.

When a contract is accounted for as a hedge of an identifiable position, the cash flows of the contract are classified in the same manner as the cash flows of the position being hedged.

* Amendments effective for annual periods beginning on or after 1 January 2010.
Financing activities

The separate disclosure of cash flows arising from financing activities is important because it is useful in predicting claims on future cash flows by providers of capital to the entity. Examples of cash flows arising from financing activities are:

(a) cash proceeds from issuing shares or other equity instruments;
(b) cash payments to owners to acquire or redeem the entity's shares;
(c) cash proceeds from issuing debentures, loans, notes, bonds, mortgages and other short-term or long-term borrowings;
(d) cash repayments of amounts borrowed; and
(e) cash payments by a lessee for the reduction of the outstanding liability relating to a finance lease.

Reporting cash flows from operating activities

An entity shall report cash flows from operating activities using either:

(a) the direct method, whereby major classes of gross cash receipts and gross cash payments are disclosed; or
(b) the indirect method, whereby profit or loss is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments, and items of income or expense associated with investing or financing cash flows.

Entities are encouraged to report cash flows from operating activities using the direct method. The direct method provides information which may be useful in estimating future cash flows and which is not available under the indirect method. Under the direct method, information about major classes of gross cash receipts and gross cash payments may be obtained either:

(a) from the accounting records of the entity; or
(b) by adjusting sales, cost of sales (interest and similar income and interest expense and similar charges for a financial institution) and other items in the statement of comprehensive income for:
   (i) changes during the period in inventories and operating receivables and payables;
   (ii) other non-cash items; and
   (iii) other items for which the cash effects are investing or financing cash flows.

Under the indirect method, the net cash flow from operating activities is determined by adjusting profit or loss for the effects of:

(a) changes during the period in inventories and operating receivables and payables;
(b) non-cash items such as depreciation, provisions, deferred taxes, unrealised foreign currency gains and losses, and undistributed profits of associates; and
(c) all other items for which the cash effects are investing or financing cash flows.

Alternatively, the net cash flow from operating activities may be presented under the indirect method by showing the revenues and expenses disclosed in the statement of comprehensive income and the changes during the period in inventories and operating receivables and payables.

* Amendments effective for annual periods beginning on or after 1 July 2009.
Reporting cash flows from investing and financing activities

21 An entity shall report separately major classes of gross cash receipts and gross cash payments arising from investing and financing activities, except to the extent that cash flows described in paragraphs 22 and 24 are reported on a net basis.

Reporting cash flows on a net basis

22 Cash flows arising from the following operating, investing or financing activities may be reported on a net basis:

(a) cash receipts and payments on behalf of customers when the cash flows reflect the activities of the customer rather than those of the entity; and

(b) cash receipts and payments for items in which the turnover is quick, the amounts are large, and the maturities are short.

23 Examples of cash receipts and payments referred to in paragraph 22(a) are:

(a) the acceptance and repayment of demand deposits of a bank;

(b) funds held for customers by an investment entity; and

(c) rents collected on behalf of, and paid over to, the owners of properties.

23A Examples of cash receipts and payments referred to in paragraph 22(b) are advances made for, and the repayment of:

(a) principal amounts relating to credit card customers;

(b) the purchase and sale of investments; and

(c) other short-term borrowings, for example, those which have a maturity period of three months or less.

24 Cash flows arising from each of the following activities of a financial institution may be reported on a net basis:

(a) cash receipts and payments for the acceptance and repayment of deposits with a fixed maturity date;

(b) the placement of deposits with and withdrawal of deposits from other financial institutions; and

(c) cash advances and loans made to customers and the repayment of those advances and loans.

Foreign currency cash flows

25 Cash flows arising from transactions in a foreign currency shall be recorded in an entity’s functional currency by applying to the foreign currency amount the exchange rate between the functional currency and the foreign currency at the date of the cash flow.

26 The cash flows of a foreign subsidiary shall be translated at the exchange rates between the functional currency and the foreign currency at the dates of the cash flows.

27 Cash flows denominated in a foreign currency are reported in a manner consistent with HKAS 21 The Effects of Changes in Foreign Exchange Rates. This permits the use of an exchange rate that approximates the actual rate. For example, a weighted average exchange rate for a period may be used for recording foreign currency transactions or the translation of the cash flows of a foreign subsidiary. However, HKAS 21 does not permit use of the exchange rate at the end of the reporting period when translating the cash flows of a foreign subsidiary.
Unrealised gains and losses arising from changes in foreign currency exchange rates are not cash flows. However, the effect of exchange rate changes on cash and cash equivalents held or due in a foreign currency is reported in the statement of cash flows in order to reconcile cash and cash equivalents at the beginning and the end of the period. This amount is presented separately from cash flows from operating, investing and financing activities and includes the differences, if any, had those cash flows been reported at end of period exchange rates.

Interest and dividends

Cash flows from interest and dividends received and paid shall each be disclosed separately. Each shall be classified in a consistent manner from period to period as either operating, investing or financing activities.

The total amount of interest paid during a period is disclosed in the statement of cash flows whether it has been recognised as an expense in profit or loss or capitalised in accordance with HKAS 23 Borrowing Costs.

Interest paid and interest and dividends received are usually classified as operating cash flows for a financial institution. However, there is no consensus on the classification of these cash flows for other entities. Interest paid and interest and dividends received may be classified as operating cash flows because they enter into the determination of profit or loss. Alternatively, interest paid and interest and dividends received may be classified as financing cash flows and investing cash flows respectively, because they are costs of obtaining financial resources or returns on investments.

Dividends paid may be classified as a financing cash flow because they are a cost of obtaining financial resources. Alternatively, dividends paid may be classified as a component of cash flows from operating activities in order to assist users to determine the ability of an entity to pay dividends out of operating cash flows.

Taxes on income

Cash flows arising from taxes on income shall be separately disclosed and shall be classified as cash flows from operating activities unless they can be specifically identified with financing and investing activities.

Taxes on income arise on transactions that give rise to cash flows that are classified as operating, investing or financing activities in a statement of cash flows. While tax expense may be readily identifiable with investing or financing activities, the related tax cash flows are often impracticable to identify and may arise in a different period from the cash flows of the underlying transaction. Therefore, taxes paid are usually classified as cash flows from operating activities. However, when it is practicable to identify the tax cash flow with an individual transaction that gives rise to cash flows that are classified as investing or financing activities the tax cash flow is classified as an investing or financing activity as appropriate. When tax cash flows are allocated over more than one class of activity, the total amount of taxes paid is disclosed.

Investments in subsidiaries, associates and joint ventures

When accounting for an investment in an associate, a joint venture or a subsidiary accounted for by use of the equity or cost method, an investor restricts its reporting in the statement of cash flows to the cash flows between itself and the investee, for example, to dividends and advances.

An entity which reports its interest in a jointly controlled entity (see HKAS 31 Interests in Joint Ventures) using proportionate consolidation, includes in its consolidated statement of cash flows its proportionate share of the jointly controlled entity’s cash flows. An entity which reports such an interest in an associate or a joint venture using the equity method includes in its statement of cash flows the cash flows in respect of its investments in the jointly controlled entity, associate or joint venture, and distributions and other payments or receipts between it and the jointly controlled entity, associate or joint venture.
Changes in ownership interests in subsidiaries and other businesses

39 The aggregate cash flows arising from obtaining or losing control of subsidiaries or other businesses shall be presented separately and classified as investing activities.

40 An entity shall disclose, in aggregate, in respect of both obtaining and losing control of subsidiaries or other businesses during the period each of the following:

(a) the total consideration paid or received;
(b) the portion of the consideration consisting of cash and cash equivalents;
(c) the amount of cash and cash equivalents in the subsidiaries or other businesses over which control is obtained or lost; and
(d) the amount of the assets and liabilities other than cash or cash equivalents in the subsidiaries or other businesses over which control is obtained or lost, summarised by each major category.

40A An investment entity, as defined in HKFRS 10 Consolidated Financial Statements, need not apply paragraphs 40(c) or 40(d) to an investment in a subsidiary that is required to be measured at fair value through profit or loss.

41 The separate presentation of the cash flow effects of obtaining or losing control of subsidiaries or other businesses as single line items, together with the separate disclosure of the amounts of assets and liabilities acquired or disposed of, helps to distinguish those cash flows from the cash flows arising from the other operating, investing and financing activities. The cash flow effects of losing control are not deducted from those of obtaining control.

42 The aggregate amount of the cash paid or received as consideration for obtaining or losing control of subsidiaries or other businesses is reported in the statement of cash flows net of cash and cash equivalents acquired or disposed of as part of such transactions, events or changes in circumstances.

42A Cash flows arising from changes in ownership interests in a subsidiary that do not result in a loss of control shall be classified as cash flows from financing activities, unless the subsidiary is held by an investment entity, as defined in HKFRS 10, and is required to be measured at fair value through profit or loss.

42B Changes in ownership interests in a subsidiary that do not result in a loss of control, such as the subsequent purchase or sale by a parent of a subsidiary’s equity instruments, are accounted for as equity transactions (see HKFRS 10 Consolidated Financial Statements), unless the subsidiary is held by an investment entity and is required to be measured at fair value through profit or loss. Accordingly, the resulting cash flows are classified in the same way as other transactions with owners described in paragraph 17.

Non-cash transactions

43 Investing and financing transactions that do not require the use of cash or cash equivalents shall be excluded from a statement of cash flows. Such transactions shall be disclosed elsewhere in the financial statements in a way that provides all the relevant information about these investing and financing activities.
Many investing and financing activities do not have a direct impact on current cash flows although they do affect the capital and asset structure of an entity. The exclusion of non-cash transactions from the statement of cash flows is consistent with the objective of a statement of cash flows as these items do not involve cash flows in the current period. Examples of non-cash transactions are:

(a) the acquisition of assets either by assuming directly related liabilities or by means of a finance lease;

(b) the acquisition of an entity by means of an equity issue; and

(c) the conversion of debt to equity.

Changes in liabilities arising from financing activities

44A An entity shall provide disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities, including both changes arising from cash flows and non-cash changes.

44B To the extent necessary to satisfy the requirement in paragraph 44A, an entity shall disclose the following changes in liabilities arising from financing activities:

(a) changes from financing cash flows;

(b) changes arising from obtaining or losing control of subsidiaries or other businesses;

(c) the effect of changes in foreign exchange rates;

(d) changes in fair values; and

(e) other changes.

44C Liabilities arising from financing activities are liabilities for which cash flows were, or future cash flows will be, classified in the statement of cash flows as cash flows from financing activities. In addition, the disclosure requirement in paragraph 44A also applies to changes in financial assets (for example, assets that hedge liabilities arising from financing activities) if cash flows from those financial assets were, or future cash flows will be, included in cash flows from financing activities.

44D One way to fulfil the disclosure requirement in paragraph 44A is by providing a reconciliation between the opening and closing balances in the statement of financial position for liabilities arising from financing activities, including the changes identified in paragraph 44B. Where an entity discloses such a reconciliation, it shall provide sufficient information to enable users of the financial statements to link items included in the reconciliation to the statement of financial position and the statement of cash flows.

44E If an entity provides the disclosure required by paragraph 44A in combination with disclosures of changes in other assets and liabilities, it shall disclose the changes in liabilities arising from financing activities separately from changes in those other assets and liabilities.

Components of cash and cash equivalents

45 An entity shall disclose the components of cash and cash equivalents and shall present a reconciliation of the amounts in its statement of cash flows with the equivalent items reported in the statement of financial position.

46 In view of the variety of cash management practices and banking arrangements around the world and in order to comply with HKAS 1 Presentation of Financial Statements, an entity discloses the policy which it adopts in determining the composition of cash and cash equivalents.
The effect of any change in the policy for determining components of cash and cash equivalents, for example, a change in the classification of financial instruments previously considered to be part of an entity’s investment portfolio, is reported in accordance with HKAS 8 Accounting Policies, Changes in Accounting Estimates and Errors.

### Other disclosures

48. An entity shall disclose, together with a commentary by management, the amount of significant cash and cash equivalent balances held by the entity that are not available for use by the group.

49. There are various circumstances in which cash and cash equivalent balances held by an entity are not available for use by the group. Examples include cash and cash equivalent balances held by a subsidiary that operates in a country where exchange controls or other legal restrictions apply when the balances are not available for general use by the parent or other subsidiaries.

50. Additional information may be relevant to users in understanding the financial position and liquidity of an entity. Disclosure of this information, together with a commentary by management, is encouraged and may include:

   (a) the amount of undrawn borrowing facilities that may be available for future operating activities and to settle capital commitments, indicating any restrictions on the use of these facilities;

   (b) [deleted]

   (c) the aggregate amount of cash flows that represent increases in operating capacity separately from those cash flows that are required to maintain operating capacity; and

   (d) the amount of the cash flows arising from the operating, investing and financing activities of each reportable segment (see HKFRS 8 Operating Segments).

51. The separate disclosure of cash flows that represent increases in operating capacity and cash flows that are required to maintain operating capacity is useful in enabling the user to determine whether the entity is investing adequately in the maintenance of its operating capacity. An entity that does not invest adequately in the maintenance of its operating capacity may be prejudicing future profitability for the sake of current liquidity and distributions to owners.
The disclosure of segmental cash flows enables users to obtain a better understanding of the relationship between the cash flows of the business as a whole and those of its component parts and the availability and variability of segmental cash flows.

**Effective date**

This Hong Kong Accounting Standard becomes operative for financial statements covering periods beginning on or after 1 January 2005. Earlier application is encouraged.

HKAS 27 (as amended in 2008) amended paragraphs 39 – 42 and added paragraphs 42A and 42B. An entity shall apply those amendments for annual periods beginning on or after 1 July 2009. If an entity applies HKAS 27 (amended 2008) for an earlier period, the amendments shall be applied for that earlier period. The amendments shall be applied retrospectively.

Paragraph 14 was amended by Improvements to HKFRSs issued in October 2008. An entity shall apply that amendment for annual periods beginning on or after 1 January 2009. Earlier application is permitted. If an entity applies the amendment for an earlier period it shall disclose that fact and apply paragraph 68A of HKAS 16.

Paragraph 16 was amended by Improvements to HKFRSs issued in May 2009. An entity shall apply that amendment for annual periods beginning on or after 1 January 2010. Earlier application is permitted. If an entity applies the amendment for an earlier period it shall disclose that fact.

HKFRS 10 and HKFRS 11 Joint Arrangements, issued in June 2011, amended paragraphs 37, 38 and 42B and deleted paragraph 50(b). An entity shall apply those amendments when it applies HKFRS 10 and HKFRS 11.

Investment Entities (Amendments to HKFRS 10, HKFRS 12 and HKAS 27(2011)), issued in December 2012, amended paragraphs 42A and 42B and added paragraph 40A. An entity shall apply those amendments for annual periods beginning on or after 1 January 2014. Earlier application of Investment Entities is permitted. If an entity applies those amendments earlier it shall also apply all amendments included in Investment Entities at the same time.

HKFRS 16 Leases, issued in May 2016, amended paragraphs 17 and 44. An entity shall apply those amendments when it applies HKFRS 16.

Disclosure Initiative (Amendments to HKAS 7), issued in January 2016, added paragraphs 44A–44E. An entity shall apply those amendments for annual periods beginning on or after 1 January 2017. Earlier application is permitted. When the entity first applies those amendments, it is not required to provide comparative information for preceding periods.
Appendix

Comparison with International Accounting Standards

This comparison appendix, which was prepared as at December 2004 and deals only with significant differences in the standards extant, is produced for information only and does not form part of the standards in HKAS 7.

The International Accounting Standard comparable with HKAS 7 is IAS 7 *Statement of Cash Flows*.

There are no major textual differences between HKAS 7 and IAS 7.
Appendix A

Statement of cash flows for an entity other than a financial institution

This appendix accompanies, but is not part of, IAS 7.

1. The examples show only current period amounts. Corresponding amounts for the preceding period are required to be presented in accordance with IAS 1 Presentation of Financial Statements.

2. Information from the statement of comprehensive income and statement of financial position is provided to show how the statements of cash flows under the direct method and indirect method have been derived. Neither the statement of comprehensive income nor the statement of financial position is presented in conformity with the disclosure and presentation requirements of other Standards.

3. The following additional information is also relevant for the preparation of the statements of cash flows:

- all of the shares of a subsidiary were acquired for 590. The fair values of assets acquired and liabilities assumed were as follows:

<table>
<thead>
<tr>
<th>Asset Description</th>
<th>Fair Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Inventories</td>
<td>100</td>
</tr>
<tr>
<td>Accounts receivable</td>
<td>100</td>
</tr>
<tr>
<td>Cash</td>
<td>40</td>
</tr>
<tr>
<td>Property, plant and equipment</td>
<td>650</td>
</tr>
<tr>
<td>Trade payables</td>
<td>100</td>
</tr>
<tr>
<td>Long-term debt</td>
<td>200</td>
</tr>
</tbody>
</table>

- 250 was raised from the issue of share capital and a further 250 was raised from long-term borrowings.

- interest expense was 400, of which 170 was paid during the period. Also, 100 relating to interest expense of the prior period was paid during the period.

- dividends paid were 1,200.

- the liability for tax at the beginning and end of the period was 1,000 and 400 respectively. During the period, a further 200 tax was provided for. Withholding tax on dividends received amounted to 100.

- during the period, the group acquired property, plant and equipment and right-of-use assets relating to property, plant and equipment with an aggregate cost of 1,250 of which 900 was acquired by means of finance leases related to right-of-use assets. Cash payments of 350 were made to purchase property, plant and equipment.

- plant with original cost of 80 and accumulated depreciation of 60 was sold for 20.

- accounts receivable as at the end of 20X2 include 100 of interest receivable.
### Consolidated statement of comprehensive income for the period ended 20X2

<table>

## Indirect method statement of cash flows (paragraph 18(b))

### 20X2

### Cash flows from operating activities

Profit before taxation | 3,350  
Adjustments for:  
- Depreciation | 450  
- Foreign exchange loss | 40  
- Investment income (500) |  
- Interest expense | 400  

|  
Increase in trade and other receivables | (500)  
Decrease in inventories | 1,050  
Decrease in trade payables | (1,740)  
|  
Cash generated from operations | 2,550  
Interest paid | (270)  
Income taxes paid | (900)  

\[ \text{Net cash from operating activities} = 1,380 \]

### Cash flows from investing activities

Acquisition of subsidiary X net of cash acquired (Note A) | (550)  
Purchase of property, plant and equipment (Note B) | (350)  
Proceeds from sale of equipment | 20  
Interest received | 200  
Dividends received | 200  

\[ \text{Net cash used in investing activities} = (480) \]

### Cash flows from financing activities

Proceeds from issue of share capital | 250  
Proceeds from long-term borrowings | 250  
Payment of finance-lease liabilities | (90)  
Dividends paid* | (1,200)  

\[ \text{Net cash used in financing activities} = (790) \]

### Net increase in cash and cash equivalents

\[ \text{Net increase in cash and cash equivalents} = 110 \]

### Cash and cash equivalents at beginning of period (Note C)

\[ \text{Cash and cash equivalents at beginning of period} = 120 \]

### Cash and cash equivalents at end of period (Note C)

\[ \text{Cash and cash equivalents at end of period} = 230 \]

* This could also be shown as an operating cash flow.
Notes to the statement of cash flows
(direct method and indirect method)

A. Obtaining control of subsidiary

During the period the Group obtained control of subsidiary X. The fair values of assets acquired and liabilities assumed were as follows:

<table>
<thead>
<tr>
<th>Item</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cash</td>
<td>40</td>
</tr>
<tr>
<td>Inventories</td>
<td>100</td>
</tr>
<tr>
<td>Accounts receivable</td>
<td>100</td>
</tr>
<tr>
<td>Property, plant and equipment</td>
<td>650</td>
</tr>
<tr>
<td>Trade payables</td>
<td>(100)</td>
</tr>
<tr>
<td>Long-term debt</td>
<td>(200)</td>
</tr>
<tr>
<td><strong>Total purchase price paid in cash</strong></td>
<td>590</td>
</tr>
<tr>
<td>Less: Cash of subsidiary X acquired</td>
<td>(40)</td>
</tr>
<tr>
<td><strong>Cash paid to obtain control, net of cash acquired</strong></td>
<td>550</td>
</tr>
</tbody>
</table>

B. Property, plant and equipment

During the period, the Group acquired property, plant and equipment and right-of-use assets relating to property, plant and equipment with an aggregate cost of 1,250 of which 900 was acquired by means of finance leases related to right-of-use assets. Cash payments of 350 were made to purchase property, plant and equipment.

C. Cash and cash equivalents

Cash and cash equivalents consist of cash on hand and balances with banks, and investments in money market instruments. Cash and cash equivalents included in the statement of cash flows comprise the following amounts in the statement of financial position:

<table>
<thead>
<tr>
<th></th>
<th>20X2</th>
<th>20X1</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cash on hand and balances with banks</td>
<td>40</td>
<td>25</td>
</tr>
<tr>
<td>Short-term investments</td>
<td>190</td>
<td>135</td>
</tr>
<tr>
<td><strong>Cash and cash equivalents as previously reported</strong></td>

<td>-</td>
<td>(40)</td>
</tr>
<tr>
<td><strong>Cash and cash equivalents as restated</strong></td>
<td>230</td>
<td>120</td>
</tr>
</tbody>
</table>

Cash and cash equivalents at the end of the period include deposits with banks of 100 held by a subsidiary which are not freely remissible to the holding company because of currency exchange restrictions.

The Group has undrawn borrowing facilities of 2,000, of which 700 may be used only for future expansion.

* Amendments effective for annual periods beginning on or after 1 July 2009.

Alternative presentation (indirect method)

As an alternative, in an indirect method statement of cash flows, operating profit before working capital changes is sometimes presented as follows:

- Revenues excluding investment income: 30,650
- Operating expense excluding depreciation: (26,910)

Operating profit before working capital changes: 3,740
Appendix B

Statement of cash flows for a financial institution

This appendix accompanies, but is not part of, IAS 7.

1 The example shows only current period amounts. Comparative amounts for the preceding period are required to be presented in accordance with IAS 1 Presentation of Financial Statements.

2 The example is presented using the direct method.

Basis for Conclusions on
IAS 7 Statement of Cash Flows

This Basis for Conclusions accompanies, but is not part of, IAS 7.

HKAS 7 is based on IAS 7 Statement of Cash Flows. In approving HKAS 7, the Council of the Hong Kong Institute of Certified Public Accountants considered and agreed with the IASB’s Basis for Conclusions on IAS 7. Accordingly, there are no significant differences between HKAS 7 and IAS 7. The IASB’s Basis for Conclusions is reproduced below. The paragraph numbers of IAS 7 referred to below generally correspond with those in HKAS 7.

BC1 This Basis for Conclusions summarises the considerations of the International Accounting Standards Board in reaching its conclusions on amending IAS 7 Statement of Cash Flows as part of Improvements to IFRSs issued in April 2009. Individual Board members gave greater weight to some factors than to others.

BC2 IAS 7 was developed by the International Accounting Standards Committee in 1992 and was not accompanied by a Basis for Conclusions. This Basis refers to clarification of guidance on classification of cash flows from investing activities.

Classification of expenditures on unrecognised assets

BC3 In 2008 the International Financial Reporting Interpretations Committee (IFRIC) reported to the Board that practice differed for the classification of cash flows for expenditures incurred with the objective of generating future cash flows when those expenditures are not recognised as assets in accordance with IFRSs. Some entities classified such expenditures as cash flows from operating activities and others classified them as investing activities. Examples of such expenditures are those for exploration and evaluation activities, which IFRS 6 Exploration for and Evaluation of Mineral Resources permits to be recognised as either an asset or an expense depending on the entity’s previous accounting policies for those expenditures. Expenditures on advertising and promotional activities, staff training, and research and development could also raise the same issue.

BC4 The IFRIC decided not to add this issue to its agenda but recommended that the Board should amend IAS 7 to state explicitly that only an expenditure that results in a recognised asset can be classified as a cash flow from investing activity.

BC5 In 2008, as part of its annual improvements project, the Board considered the principles in IAS 7, specifically guidance on the treatment of such expenditures in the statement of cash flows. The Board noted that even though paragraphs 14 and 16 of IAS 7 appear to be clear that only expenditure that results in the recognition of an asset should be classified as cash flows from investing activities, the wording is not definitive in this respect. Some might have misinterpreted the reference in paragraph 11 of IAS 7 for an entity to assess classification by activity that is most appropriate to its business to imply that the assessment is an accounting policy choice.

BC6 Consequently, in Improvements to IFRSs issued in April 2009, the Board removed the potential misinterpretation by amending paragraph 16 of IAS 7 to state explicitly that only an expenditure that results in a recognised asset can be classified as a cash flow from investing activity.

BC7 The Board concluded that this amendment better aligns the classification of cash flows from investing activities in the statement of cash flows and the presentation of recognised assets in the statement of financial position, reduces divergence in practice and, therefore, results in financial statements that are easier for users to understand.

BC8 The Board also amended the Basis for Conclusions on IFRS 6 to clarify the Board’s view that the exemption in IFRS 6 applies only to recognition and measurement of exploration and evaluation assets, not to the classification of related expenditures in the statement of cash flows, for the same reasons set out in paragraph BC7.
Changes in liabilities arising from financing activities
(paragraphs 44A–44E)

Background to the January 2016 Amendments

BC9 In January 2016 the Board amended IAS 7 to require entities to provide disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities. The amendments were in response to requests from users, including those received at the Board’s Financial Reporting Disclosure Discussion Forum in January 2013 and reflected in the resulting Feedback Statement (‘the Feedback Statement’), which was issued in May 2013. Users highlighted that understanding an entity’s cash flows is critical to their analysis and that there is a need for improved disclosures about an entity’s debt, including changes in debt during the reporting period. The Feedback Statement noted that users had been consistently asking for the Board to introduce a requirement for entities to disclose and explain a net debt reconciliation.

BC10 In early 2014, to understand the reasons for their requests for more disclosure about net debt, the Board undertook a survey of investors. The survey sought information about why investors seek to understand the changes in debt between the beginning and the end of a reporting period. The survey also sought input on disclosures about cash and cash equivalents. On the basis of the survey, the Board identified that investors use a net debt reconciliation in their analysis of the entity:

(a) to check their understanding of the entity’s cash flows, because it provides a reconciliation between the statement of financial position and the statement of cash flows;

(b) to improve their confidence in forecasting the entity’s future cash flows when they can use a reconciliation to check their understanding of the entity’s cash flows;

(c) to provide information about the entity’s sources of finance and how those sources have been used over time; and

(d) to help them understand the entity’s exposure to risks associated with financing.

BC11 The survey helped the Board to understand why investors were calling for improved disclosures about changes in debt during the reporting period. The Board noted that one challenge in responding to this need was that debt is not defined or required to be disclosed in current IFRS Standards. The Board noted that finding a commonly agreed definition of debt would be difficult. However, the Board decided that it could use the definition of financing activities in IAS 7. It therefore decided to propose a requirement to disclose a reconciliation between the amounts in the opening and the amounts in the closing statements of financial position for liabilities for which cash flows were, or future cash flows will be, classified as financing activities in the statement of cash flows.

BC12 IAS 7 defines financing activities as activities that result in changes in the size and composition of the contributed equity and borrowings of the entity. The Board proposed that a reconciliation of liabilities arising from financing activities would provide the information about debt that users of financial statements were requesting.

BC13 In December 2014 the Board published an Exposure Draft Disclosure Initiative (Proposed amendments to IAS 7) (‘the 2014 Exposure Draft’) seeking views on the proposals for a reconciliation of liabilities arising from financing activities.

Feedback on the proposals set out in the Exposure Draft

BC14 The feedback received on the 2014 Exposure Draft provided evidence that the disclosure would provide users of financial statements with the information they were seeking in order to analyse an entity’s cash flows. The Board decided to finalise the amendments to IAS 7 (‘the 2016 Amendments’); paragraphs BC15–BC24 set out how the Board responded to the feedback received on the 2014 Exposure Draft.
The objective of the disclosure

BC15 Feedback on the 2014 Exposure Draft noted that the proposal did not set out a disclosure objective, and consequently it was not sufficiently clear how entities would determine the most appropriate way to provide the required disclosure. The Board agreed with this feedback and included an objective within the requirement set out in paragraph 44A of the 2016 Amendments.

BC16 In setting the disclosure objective the Board decided the objective should reflect the needs of the users of financial statements, including those summarised in paragraph BC10.

Application of the 2016 Amendments to financial institutions

BC17 Some respondents to the 2014 Exposure Draft from financial institutions stated that the proposals would provide little or no relevant information to users of their financial statements because:

(a) only some of the sources of finance for a financial institution are classified as ‘financing activities’ (for example, deposits from customers provide finance but in practice the resulting cash flows are typically classified as operating cash flows). A reconciliation may therefore provide an incomplete picture of the changes in the financing structure of a financial institution; and

(b) other disclosure requirements (for example, comprehensive regulatory disclosure requirements) may already result in sufficient disclosure about an entity’s financing structure.

BC18 After taking into consideration the feedback from respondents from financial institutions, the Board decided that the disclosure requirement could be satisfied in various ways, and not only by providing a reconciliation. The Board noted that when an entity is considering whether it has fulfilled the disclosure requirement, it should take into consideration:

(a) the extent to which information about changes in liabilities arising from financing activities provides relevant information to its users, considering the needs of users summarised in paragraph BC10; and

(b) whether the entity is satisfying the disclosure requirement through other disclosures included in the financial statements.

BC19 The Board therefore decided that a reconciliation between the opening and closing balances in the statement of financial position for liabilities arising from financing activities is one way to fulfill the disclosure requirement but should not be a mandatory format.

Information that supplements the disclosures

BC20 Some respondents to the 2014 Exposure Draft expressed a concern that the proposals in the Exposure Draft were too restrictive because, in their view:

(a) the proposed disclosure would not include liabilities that an entity considers to be sources of finance although the entity does not classify them as financing activities (for example, pension liabilities); and

(b) entities that already provided a net debt reconciliation (a reconciliation of movements in a net balance comprising debt less cash and cash equivalents) would be prevented from providing such a reconciliation, even if users would find it useful.

BC21 The Board did not intend to prevent entities from providing information required by paragraph 44A in a format that combines it with information about changes in other assets and liabilities. For example, an entity could provide that information as part of a net debt reconciliation, as described in paragraph BC20(b). To ensure users can identify the information required by paragraph 44A, the format selected needs to distinguish that information from information about changes in other assets and liabilities. In finalising the 2016 Amendments, the Board clarified these points in paragraph 44E.
Financial assets

Some respondents to the 2014 Exposure Draft asked the Board to clarify whether changes in financial assets held to hedge financial liabilities could also be included in the disclosure required by the 2016 Amendments. The Board noted that paragraph G.2 of the Guidance on implementing IFRS 9 Financial Instruments states that cash flows arising from a hedging instrument are classified as operating, investing or financing activities, on the basis of the classification of the cash flows arising from the hedged item. Consequently, the Board clarified in paragraph 44C that changes in financial assets held to hedge financial liabilities are included in the disclosure required by paragraph 44A.

Cost-benefit considerations

The Board considered the feedback received on perceived costs and benefits in finalising the 2016 Amendments. The Board noted that there will be initial costs for preparers to update information technology systems to enable changes in liabilities arising from financing activities to be tracked and collated. The Board also acknowledged that disclosing additional information could result in costs relating to extending the existing internal controls and audit processes of the entity. However, the Board noted that much of the information is already available to preparers. It also noted that the 2016 Amendments do not change the recognition or measurement for liabilities arising from financing activities; instead, they track changes in those items. Consequently, the Board concluded that it does not foresee any significant ongoing cost related to providing this information, and that the informational benefits to users of financial statements would outweigh the costs.

Illustrative example

Some respondents to the 2014 Exposure Draft stated that the example proposed within the Exposure Draft was too simplistic and might not help preparers in disclosing relevant information, because in practice the reconciliation would be more detailed. To address this feedback, the Board inserted a further example in the illustrative examples accompanying IAS 7.

Other disclosures

To supplement the current disclosure requirements in paragraph 48 of IAS 7 the 2014 Exposure Draft proposed additional disclosure requirements about an entity’s liquidity such as restrictions that affect an entity’s decision to use cash and cash equivalent balances. However, in the light of the responses, the Board decided that further work is needed before it can determine whether and how to finalise requirements arising from that proposal. The Board decided to continue that work without delaying the improvements to financial reporting that it expects will result from adding paragraphs 44A–44E to IAS 7. The Board may also, in due course, consider adding to its technical work programme a project that would look at liquidity disclosures more broadly.

Transition and effective date

Amendments to IAS 7

The Board concluded that timely application of the 2016 Amendments would respond to a long-standing request from users of financial statements. Thus, the Board decided that the 2016 Amendments should be applied for annual reporting periods beginning on or after 1 January 2017, with early application permitted.

Because the 2016 Amendments were issued in January 2016, which is less than one year before the beginning of the period when some entities could be required to apply them, the Board exempted entities from providing comparative information when they first apply the amendments.
Dissenting opinion

The following contains dissenting opinion to the Amendments to IAS 7 that are not yet effective.

Dissent of Mr Takatsugu Ochi from Disclosure Initiative (Amendments to IAS 7)

DO1 Mr Ochi voted against the publication of Disclosure Initiative (Amendments to IAS 7) (the 2016 Amendments). The reasons for his dissent are set out below.

DO2 Mr Ochi believes that financial statements that reflect the 2016 Amendments may provide incomplete information about an entity’s management of liquidity. The objective of the 2016 Amendments is to require disclosures that enable users to evaluate changes in liabilities arising from financing activities, including both changes arising from cash flows and non-cash changes. However, Mr Ochi thinks that users of financial statements are seeking clearer information about entities’ management of liquidity risk. Consequently, he thinks that the information provided by the 2016 Amendments will not meet users’ needs. Mr Ochi thinks that the Board has issued these amendments without setting a clear vision of overall improvements to the disclosure about an entity’s liquidity risk management. He thinks that this could confuse and mislead users of financial statements.

DO3 The objective mentioned in paragraph DO2 refers to liabilities arising from financing activities. Paragraph 44C specifies that those liabilities are liabilities for which cash flows were, or future cash flows will be, classified in the statement of cash flows as cash flows from financing activities. However, Mr Ochi thinks that specifying the scope of the disclosure requirement in this way does not capture the information that users need. This is because changes in liabilities arising from financing activities are different from the information used to assess liquidity risk management. Because IAS 7 permits an entity to classify some cash flows (such as interest payments) as either operating or financing, the understanding of what constitutes changes in liabilities arising from financing activities may vary among preparers. In Mr Ochi’s view, preparers may have a more precise understanding about what constitutes information on liquidity risk than simply understanding changes in liabilities arising from financing activities.

DO4 Mr Ochi also thinks that if an entity provides the disclosures required by paragraph 44A in combination with disclosure of changes in the amount of cash and cash equivalents and does not disclose information about the location and availability of the cash and cash equivalents, the disclosure is sometimes irrelevant to how an entity manages liquidity. If users expect to obtain a full picture of an entity’s liquidity risk management as a result of the 2016 Amendments, they may be confused and misled.

DO5 Mr Ochi thinks that providing the disclosure may require excessive work and hence may be inefficient from a preparer’s point of view. He notes that the Board may conduct research regarding the effectiveness of IAS 7. Because he regards IAS 7 as having some significant shortcomings, he believes that issuing amendments based on the existing statement of cash flows is not a worthwhile endeavour. He also thinks that it could reduce the clarity of the statement of cash flows.

DO6 Mr Ochi also has a significant concern regarding the costs required to prepare the disclosure. Although the 2016 Amendments are disclosure-only amendments, all reporting entities will need to consider providing this disclosure. For this disclosure, an entity may be required to adjust items already presented as operating and financing activities in a statement of cash flows (for example, interest payments that are classified as operating activities), which may require system changes. Concurrently, an entity may also have to initiate system changes to prepare for applying IFRS 9 Financial Instruments and IFRS 15 Revenue from Contracts with Customers (both effective on 1 January 2018) as well as IFRS 16 Leases (effective on 1 January 2019). Mr Ochi believes that the costs that will be incurred by entities as a consequence of those other changes will be considerable and he thinks that this fact is not reflected in the conclusion the Board had reached as a consequence of its assessment of costs pertaining to this disclosure. Taking these matters into consideration, Mr Ochi believes that the costs of the 2016 Amendments will outweigh the benefits.
