## **BASIS FOR CONCLUSIONS**

### **IMPLEMENTATION GUIDANCE**

- A Tables – Provisions, contingent liabilities, contingent assets and reimbursements**
- B Decision tree**
- C Examples: recognition**
- D Examples: disclosures**

Hong Kong Accounting Standard 37 *Provisions, Contingent Liabilities and Contingent Assets* (HKAS 37) is set out in paragraphs 1-105. All the paragraphs have equal authority. HKAS 37 should be read in the context of its objective, the *Preface to Hong Kong Financial Reporting Standards* and the *Conceptual Framework for Financial Reporting*. HKAS 8 *Accounting Policies, Changes in Accounting Estimates and Errors* provides a basis for selecting and applying accounting policies in the absence of explicit guidance.

## Introduction

- IN1 HKAS 37 prescribes the accounting and disclosure for all provisions, contingent liabilities and contingent assets, except:
- (a) those resulting from financial instruments that are carried at fair value;
  - (b) those resulting from executory contracts, except where the contract is onerous. Executory contracts are contracts under which neither party has performed any of its obligations or both parties have partially performed their obligations to an equal extent;
  - (c) those arising in insurance entities from contracts with policyholders; or
  - (d) those covered by another Standard.

## Provisions

---

- IN2 The Standard defines provisions as liabilities of uncertain timing or amount. A provision should be recognised when, and only when:
- (a) an entity has a present obligation (legal or constructive) as a result of a past event;
  - (b) it is probable (ie more likely than not) that an outflow of resources embodying economic benefits will be required to settle the obligation; and
  - (c) a reliable estimate can be made of the amount of the obligation. The Standard notes that it is only in extremely rare cases that a reliable estimate will not be possible.
- IN3 The Standard defines a constructive obligation as an obligation that derives from an entity's actions where :
- (a) by an established pattern of past practice, published policies or a sufficiently specific current statement, the entity has indicated to other parties that it will accept certain responsibilities; and
  - (b) as a result, the entity has created a valid expectation on the part of those other parties that it will discharge those responsibilities.
- IN4 In rare cases, for example in a lawsuit, it may not be clear whether an entity has a present obligation. In these cases, a past event is deemed to give rise to a present obligation if, taking account of all available evidence, it is more likely than not that a present obligation exists at the end of the reporting period. An entity recognises a provision for that present obligation if the other recognition criteria described above are met. If it is more likely than not that no present obligation exists, the entity discloses a contingent liability, unless the possibility of an outflow of resources embodying economic benefits is remote.
- IN5 The amount recognised as a provision should be the best estimate of the expenditure required to settle the present obligation at the end of the reporting period, in other words, the amount that an entity would rationally pay to settle the obligation at the end of the reporting period or to transfer it to a third party at that time.
- IN6 The Standard requires that an entity should, in measuring a provision:
- (a) take risks and uncertainties into account. However, uncertainty does not justify the creation of excessive provisions or a deliberate overstatement of liabilities;

- (b) discount the provisions, where the effect of the time value of money is material, using a pre-tax discount rate (or rates) that reflect(s) current market assessments of the time value of money and those risks specific to the liability that have not been reflected in the best estimate of the expenditure. Where discounting is used, the increase in the provision due to the passage of time is recognised as an interest expense;
  - (c) take future events, such as changes in the law and technological changes, into account where there is sufficient objective evidence that they will occur; and
  - (d) not take gains from the expected disposal of assets into account, even if the expected disposal is closely linked to the event giving rise to the provision.
- IN7 An entity may expect reimbursement of some or all of the expenditure required to settle a provision (for example, through insurance contracts, indemnity clauses or suppliers' warranties). An entity should:
- (a) recognise a reimbursement when, and only when, it is virtually certain that reimbursement will be received if the entity settles the obligation. The amount recognised for the reimbursement should not exceed the amount of the provision; and
  - (b) recognise the reimbursement as a separate asset. In the statement of comprehensive income, the expense relating to a provision may be presented net of the amount recognised for a reimbursement.
- IN8 Provisions should be reviewed at the end of each reporting period and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources embodying economic benefits will be required to settle the obligation, the provision should be reversed.
- IN9 A provision should be used only for expenditures for which the provision was originally recognised.

## **Provisions – specific applications**

---

- IN10 The Standard explains how the general recognition and measurement requirements for provisions should be applied in three specific cases: future operating losses; onerous contracts; and restructurings.
- IN11 Provisions should not be recognised for future operating losses. An expectation of future operating losses is an indication that certain assets of the operation may be impaired. In this case, an entity tests these assets for impairment under HKAS 36 *Impairment of Assets*.
- IN12 If an entity has a contract that is onerous, the present obligation under the contract should be recognised and measured as a provision. An onerous contract is one in which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under it.
- IN13 The Standard defines a restructuring as a programme that is planned and controlled by management, and materially changes either:
- (a) the scope of a business undertaken by an entity; or
  - (b) the manner in which that business is conducted.

- IN14 A provision for restructuring costs is recognised only when the general recognition criteria for provisions are met. In this context, a constructive obligation to restructure arises only when an entity:
- (a) has a detailed formal plan for the restructuring identifying at least:
    - (i) the business or part of a business concerned;
    - (ii) the principal locations affected;
    - (iii) the location, function, and approximate number of employees who will be compensated for terminating their services;
    - (iv) the expenditures that will be undertaken; and
    - (v) when the plan will be implemented; and
  - (b) has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.
- IN15 A management or board decision to restructure does not give rise to a constructive obligation at the end of the reporting period unless the entity has, before the end of the reporting period:
- (a) started to implement the restructuring plan; or
  - (b) communicated the restructuring plan to those affected by it in a sufficiently specific manner to raise a valid expectation in them that the entity will carry out the restructuring.
- IN16 Where a restructuring involves the sale of an operation, no obligation arises for the sale until the entity is committed to the sale, ie there is a binding sale agreement.
- IN17 A restructuring provision should include only the direct expenditures arising from the restructuring, which are those that are both:
- (a) necessarily entailed by the restructuring; and
  - (b) not associated with the ongoing activities of the entity. Thus, a restructuring provision does not include such costs as: retraining or relocating continuing staff; marketing; or investment in new systems and distribution networks.

## **Contingent liabilities**

---

- IN18 The Standard defines a contingent liability as:
- (a) a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity; or
  - (b) a present obligation that arises from past events but is not recognised because:
    - (i) it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation; or
    - (ii) the amount of the obligation cannot be measured with sufficient reliability.

- IN19 An entity should not recognise a contingent liability. An entity should disclose a contingent liability, unless the possibility of an outflow of resources embodying economic benefits is remote.

### **Contingent assets**

---

- IN20 The Standard defines a contingent asset as a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity. An example is a claim that an entity is pursuing through legal processes, where the outcome is uncertain.
- IN21 An entity should not recognise a contingent asset. A contingent asset should be disclosed where an inflow of economic benefits is probable.
- IN22 When the realisation of income is virtually certain, then the related asset is not a contingent asset and its recognition is appropriate.

### **Effective date**

---

- IN23 The Standard becomes operative for annual financial statements covering periods beginning on or after 1 January 2005. Earlier application is encouraged.

# Hong Kong Accounting Standard 37

## *Provisions, Contingent Liabilities and Contingent Assets*

### Objective

---

The objective of this Standard is to ensure that appropriate recognition criteria and measurement bases are applied to provisions, contingent liabilities and contingent assets and that sufficient information is disclosed in the notes to the financial statements to enable users to understand their nature, timing and amount.

### Scope

---

- 1 **This Standard shall be applied by all entities in accounting for provisions, contingent liabilities and contingent assets, except:**
  - (a) **those resulting from executory contracts, except where the contract is onerous; and**
  - (b) [deleted]
  - (c) **those covered by another Standard.**
- 2 This Standard does not apply to financial instruments (including guarantees) that are within the scope of HKFRS 9 *Financial Instruments*.
- 3 Executory contracts are contracts under which neither party has performed any of its obligations or both parties have partially performed their obligations to an equal extent. This Standard does not apply to executory contracts unless they are onerous.
- 4 [Deleted]
- 5 When another Standard deals with a specific type of provision, contingent liability or contingent asset, an entity applies that Standard instead of this Standard. For example, some types of provisions are addressed in Standards on:
  - (a) [deleted]
  - (b) income taxes (see HKAS 12 *Income Taxes*);
  - (c) leases (see HKFRS 16 *Leases*). However, this Standard applies to any lease that becomes onerous before the commencement date of the lease as defined in HKFRS 16. This Standard also applies to short-term leases and leases for which the underlying asset is of low value accounted for in accordance with paragraph 6 of HKFRS 16 and that have become onerous;
  - (d) employee benefits (see HKAS 19 *Employee Benefits*);
  - (e) insurance contracts (see HKFRS 4 *Insurance Contracts*). However, this Standard applies to provisions, contingent liabilities and contingent assets of an insurer, other than those arising from its contractual obligations and rights under insurance contracts within the scope of HKFRS 4;
  - (f) contingent consideration of an acquirer in a business combination (see HKFRS 3 *Business Combinations*); and
  - (g) revenue from contracts with customers (see HKFRS 15 *Revenue from Contracts with Customers*). However, as HKFRS 15 contains no specific requirements to address

contracts with customers that are, or have become, onerous, this Standard applies to such cases.

- 6 [Deleted]
- 7 This Standard defines provisions as liabilities of uncertain timing or amount. In some countries the term "provision" is also used in the context of items such as depreciation, impairment of assets and doubtful debts: these are adjustments to the carrying amounts of assets and are not addressed in this Standard.
- 8 Other Standards specify whether expenditures are treated as assets or as expenses. These issues are not addressed in this Standard. Accordingly, this Standard neither prohibits nor requires capitalisation of the costs recognised when a provision is made.
- 9 This Standard applies to provisions for restructurings (including discontinued operations). When a restructuring meets the definition of a discontinued operation, additional disclosures may be required by HKFRS 5 *Non-current Assets Held for Sale and Discontinued Operations*.

## Definitions

- 10 The following terms are used in this Standard with the meanings specified:

**A *provision* is a liability of uncertain timing or amount.**

**A *liability* is a present obligation of the entity arising from past events, the settlement of which is expected to result in an outflow from the entity of resources embodying economic benefits.<sup>1</sup>**

**An *obligating event* is an event that creates a legal or constructive obligation that results in an entity having no realistic alternative to settling that obligation.**

**A *legal obligation* is an obligation that derives from:**

- (a) a contract (through its explicit or implicit terms);
- (b) legislation; or
- (c) other operation of law.

**A *constructive obligation* is an obligation that derives from an entity's actions where:**

- (a) by an established pattern of past practice, published policies or a sufficiently specific current statement, the entity has indicated to other parties that it will accept certain responsibilities; and
- (b) as a result, the entity has created a valid expectation on the part of those other parties that it will discharge those responsibilities.

**A *contingent liability* is:**

- (a) a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity; or
- (b) a present obligation that arises from past events but is not recognised because:
  - (i) it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation; or
  - (ii) the amount of the obligation cannot be measured with sufficient reliability.

<sup>1</sup> The definition of a liability in this Standard was not revised following the revision of the definition of a liability in the *Conceptual Framework for Financial Reporting* issued in 2018.

**A *contingent asset* is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity.**

**An *onerous contract* is a contract in which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under it.**

**A *restructuring* is a programme that is planned and controlled by management, and materially changes either:**

- (a) the scope of a business undertaken by an entity; or
- (b) the manner in which that business is conducted.

## **Provisions and other liabilities**

11 Provisions can be distinguished from other liabilities such as trade payables and accruals because there is uncertainty about the timing or amount of the future expenditure required in settlement. By contrast:

- (a) trade payables are liabilities to pay for goods or services that have been received or supplied and have been invoiced or formally agreed with the supplier; and
- (b) accruals are liabilities to pay for goods or services that have been received or supplied but have not been paid, invoiced or formally agreed with the supplier, including amounts due to employees (for example, amounts relating to accrued vacation pay). Although it is sometimes necessary to estimate the amount or timing of accruals, the uncertainty is generally much less than for provisions.

Accruals are often reported as part of trade and other payables, whereas provisions are reported separately.

## **Relationship between provisions and contingent liabilities**

12 In a general sense, all provisions are contingent because they are uncertain in timing or amount. However, within this Standard the term "contingent" is used for liabilities and assets that are not recognised because their existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity. In addition, the term "contingent liability" is used for liabilities that do not meet the recognition criteria.

13 This Standard distinguishes between:

- (a) provisions - which are recognised as liabilities (assuming that a reliable estimate can be made) because they are present obligations and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligations; and
- (b) contingent liabilities - which are not recognised as liabilities because they are either:
  - (i) possible obligations, as it has yet to be confirmed whether the entity has a present obligation that could lead to an outflow of resources embodying economic benefits; or
  - (ii) present obligations that do not meet the recognition criteria in this Standard (because either it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation, or a sufficiently reliable estimate of the amount of the obligation cannot be made).

## Recognition

---

### Provisions

14 **A provision shall be recognised when:**

- (a) **an entity has a present obligation (legal or constructive) as a result of a past event;**
- (b) **it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and**
- (c) **a reliable estimate can be made of the amount of the obligation.**

**If these conditions are not met, no provision shall be recognised.**

### Present obligation

15 **In rare cases it is not clear whether there is a present obligation. In these cases, a past event is deemed to give rise to a present obligation if, taking account of all available evidence, it is more likely than not that a present obligation exists at the end of the reporting period.**

16 In almost all cases it will be clear whether a past event has given rise to a present obligation. In rare cases, for example in a lawsuit, it may be disputed either whether certain events have occurred or whether those events result in a present obligation. In such a case, an entity determines whether a present obligation exists at the end of the reporting period by taking account of all available evidence, including, for example, the opinion of experts. The evidence considered includes any additional evidence provided by events after the reporting period. On the basis of such evidence:

- (a) where it is more likely than not that a present obligation exists at the end of the reporting period, the entity recognises a provision (if the recognition criteria are met); and
- (b) where it is more likely that no present obligation exists at the end of the reporting period, the entity discloses a contingent liability, unless the possibility of an outflow of resources embodying economic benefits is remote (see paragraph 86).

### Past event

17 A past event that leads to a present obligation is called an obligating event. For an event to be an obligating event, it is necessary that the entity has no realistic alternative to settling the obligation created by the event. This is the case only:

- (a) where the settlement of the obligation can be enforced by law; or
- (b) in the case of a constructive obligation, where the event (which may be an action of the entity) creates valid expectations in other parties that the entity will discharge the obligation.

18 Financial statements deal with the financial position of an entity at the end of its reporting period and not its possible position in the future. Therefore, no provision is recognised for costs that need to be incurred to operate in the future. The only liabilities recognised in an entity's statement of financial position are those that exist at the end of the reporting period.

19 It is only those obligations arising from past events existing independently of an entity's future actions (i.e. the future conduct of its business) that are recognised as provisions. Examples of such obligations are penalties or clean-up costs for unlawful environmental damage, both of which would lead to an outflow of resources embodying economic benefits in settlement

regardless of the future actions of the entity. Similarly, an entity recognises a provision for the decommissioning costs of an oil installation or a nuclear power station to the extent that the entity is obliged to rectify damage already caused. In contrast, because of commercial pressures or legal requirements, an entity may intend or need to carry out expenditure to operate in a particular way in the future (for example, by fitting smoke filters in a certain type of factory). Because the entity can avoid the future expenditure by its future actions, for example by changing its method of operation, it has no present obligation for that future expenditure and no provision is recognised.

- 20 An obligation always involves another party to whom the obligation is owed. It is not necessary, however, to know the identity of the party to whom the obligation is owed — indeed the obligation may be to the public at large. Because an obligation always involves a commitment to another party, it follows that a management or board decision does not give rise to a constructive obligation at the end of the reporting period unless the decision has been communicated before the end of the reporting period to those affected by it in a sufficiently specific manner to raise a valid expectation in them that the entity will discharge its responsibilities.
- 21 An event that does not give rise to an obligation immediately may do so at a later date, because of changes in the law or because an act (for example, a sufficiently specific public statement) by the entity gives rise to a constructive obligation. For example, when environmental damage is caused there may be no obligation to remedy the consequences. However, the causing of the damage will become an obligating event when a new law requires the existing damage to be rectified or when the entity publicly accepts responsibility for rectification in a way that creates a constructive obligation.
- 22 Where details of a proposed new law have yet to be finalised, an obligation arises only when the legislation is virtually certain to be enacted as drafted. For the purpose of this Standard, such an obligation is treated as a legal obligation. Differences in circumstances surrounding enactment make it impossible to specify a single event that would make the enactment of a law virtually certain. In many cases it will be impossible to be virtually certain of the enactment of a law until it is enacted.

### **Probable outflow of resources embodying economic benefits**

- 23 For a liability to qualify for recognition there must be not only a present obligation but also the probability of an outflow of resources embodying economic benefits to settle that obligation. For the purpose of this Standard<sup>2</sup>, an outflow of resources or other event is regarded as probable if the event is more likely than not to occur, ie the probability that the event will occur is greater than the probability that it will not. Where it is not probable that a present obligation exists, an entity discloses a contingent liability, unless the possibility of an outflow of resources embodying economic benefits is remote (see paragraph 86).
- 24 Where there are a number of similar obligations (e.g. product warranties or similar contracts) the probability that an outflow will be required in settlement is determined by considering the class of obligations as a whole. Although the likelihood of outflow for any one item may be small, it may well be probable that some outflow of resources will be needed to settle the class of obligations as a whole. If that is the case, a provision is recognised (if the other recognition criteria are met).

### **Reliable estimate of the obligation**

- 25 The use of estimates is an essential part of the preparation of financial statements and does not undermine their reliability. This is especially true in the case of provisions, which by their nature are more uncertain than most other items in the statement of financial position. Except in extremely rare cases, an entity will be able to determine a range of possible outcomes and can therefore make an estimate of the obligation that is sufficiently reliable to use in recognising a provision.

<sup>2</sup> The interpretation of "probable" in this Standard as "more likely than not" does not necessarily apply in other Standards.

- 26 In the extremely rare case where no reliable estimate can be made, a liability exists that cannot be recognised. That liability is disclosed as a contingent liability (see paragraph 86).

### **Contingent liabilities**

- 27 An entity shall not recognise a contingent liability.**

- 28 A contingent liability is disclosed, as required by paragraph 86, unless the possibility of an outflow of resources embodying economic benefits is remote.

- 29 Where an entity is jointly and severally liable for an obligation, the part of the obligation that is expected to be met by other parties is treated as a contingent liability. The entity recognises a provision for the part of the obligation for which an outflow of resources embodying economic benefits is probable, except in the extremely rare circumstances where no reliable estimate can be made.

- 30 Contingent liabilities may develop in a way not initially expected. Therefore, they are assessed continually to determine whether an outflow of resources embodying economic benefits has become probable. If it becomes probable that an outflow of future economic benefits will be required for an item previously dealt with as a contingent liability, a provision is recognised in the financial statements of the period in which the change in probability occurs (except in the extremely rare circumstances where no reliable estimate can be made).

### **Contingent assets**

- 31 An entity shall not recognise a contingent asset.**

- 32 Contingent assets usually arise from unplanned or other unexpected events that give rise to the possibility of an inflow of economic benefits to the entity. An example is a claim that an entity is pursuing through legal processes, where the outcome is uncertain.

- 33 Contingent assets are not recognised in financial statements since this may result in the recognition of income that may never be realised. However, when the realisation of income is virtually certain, then the related asset is not a contingent asset and its recognition is appropriate.

- 34 A contingent asset is disclosed, as required by paragraph 89, where an inflow of economic benefits is probable.

- 35 Contingent assets are assessed continually to ensure that developments are appropriately reflected in the financial statements. If it has become virtually certain that an inflow of economic benefits will arise, the asset and the related income are recognised in the financial statements of the period in which the change occurs. If an inflow of economic benefits has become probable, an entity discloses the contingent asset (see paragraph 89).

## **Measurement**

---

### **Best estimate**

- 36 The amount recognised as a provision shall be the best estimate of the expenditure required to settle the present obligation at the end of the reporting period.**

- 37 The best estimate of the expenditure required to settle the present obligation is the amount that an entity would rationally pay to settle the obligation at the end of the reporting period or to transfer it to a third party at that time. It will often be impossible or prohibitively expensive to settle or transfer an obligation at the end of the reporting period. However, the estimate of the amount that an entity would rationally pay to settle or transfer the obligation gives the best

estimate of the expenditure required to settle the present obligation at the end of the reporting period.

- 38 The estimates of outcome and financial effect are determined by the judgement of the management of the entity, supplemented by experience of similar transactions and, in some cases, reports from independent experts. The evidence considered includes any additional evidence provided by events after the reporting period.
- 39 Uncertainties surrounding the amount to be recognised as a provision are dealt with by various means according to the circumstances. Where the provision being measured involves a large population of items, the obligation is estimated by weighting all possible outcomes by their associated probabilities. The name for this statistical method of estimation is "expected value". The provision will therefore be different depending on whether the probability of a loss of a given amount is, for example, 60 per cent or 90 per cent. Where there is a continuous range of possible outcomes, and each point in that range is as likely as any other, the mid-point of the range is used.

**Example**

An entity sells goods with a warranty under which customers are covered for the cost of repairs of any manufacturing defects that become apparent within the first six months after purchase. If minor defects were detected in all products sold, repair costs of 1 million would result. If major defects were detected in all products sold, repair costs of 4 million would result. The entity's past experience and future expectations indicate that, for the coming year, 75 per cent of the goods sold will have no defects, 20 per cent of the goods sold will have minor defects and 5 per cent of the goods sold will have major defects. In accordance with paragraph 24, an entity assesses the probability of an outflow for the warranty obligations as a whole.

The expected value of the cost of repairs is:

$$(75\% \text{ of nil}) + (20\% \text{ of } 1\text{m}) + (5\% \text{ of } 4\text{m}) = 400,000$$

- 40 Where a single obligation is being measured, the individual most likely outcome may be the best estimate of the liability. However, even in such a case, the entity considers other possible outcomes. Where other possible outcomes are either mostly higher or mostly lower than the most likely outcome, the best estimate will be a higher or lower amount. For example, if an entity has to rectify a serious fault in a major plant that it has constructed for a customer, the individual most likely outcome may be for the repair to succeed at the first attempt at a cost of 1,000, but a provision for a larger amount is made if there is a significant chance that further attempts will be necessary.
- 41 The provision is measured before tax, as the tax consequences of the provision, and changes in it, are dealt with under HKAS 12.

**Risks and uncertainties**

- 42 **The risks and uncertainties that inevitably surround many events and circumstances shall be taken into account in reaching the best estimate of a provision.**
- 43 Risk describes variability of outcome. A risk adjustment may increase the amount at which a liability is measured. Caution is needed in making judgements under conditions of uncertainty, so that income or assets are not overstated and expenses or liabilities are not understated. However, uncertainty does not justify the creation of excessive provisions or a deliberate overstatement of liabilities. For example, if the projected costs of a particularly adverse outcome are estimated on a prudent basis, that outcome is not then deliberately treated as more probable than is realistically the case. Care is needed to avoid duplicating adjustments for risk and uncertainty with consequent overstatement of a provision.
- 44 Disclosure of the uncertainties surrounding the amount of the expenditure is made under paragraph 85(b).

## Present value

**45 Where the effect of the time value of money is material, the amount of a provision shall be the present value of the expenditures expected to be required to settle the obligation.**

46 Because of the time value of money, provisions relating to cash outflows that arise soon after the reporting period are more onerous than those where cash outflows of the same amount arise later. Provisions are therefore discounted, where the effect is material.

**47 The discount rate (or rates) shall be a pre-tax rate (or rates) that reflect(s) current market assessments of the time value of money and the risks specific to the liability. The discount rate(s) shall not reflect risks for which future cash flow estimates have been adjusted.**

## Future events

**48 Future events that may affect the amount required to settle an obligation shall be reflected in the amount of a provision where there is sufficient objective evidence that they will occur.**

49 Expected future events may be particularly important in measuring provisions. For example, an entity may believe that the cost of cleaning up a site at the end of its life will be reduced by future changes in technology. The amount recognised reflects a reasonable expectation of technically qualified, objective observers, taking account of all available evidence as to the technology that will be available at the time of the clean-up. Thus it is appropriate to include, for example, expected cost reductions associated with increased experience in applying existing technology or the expected cost of applying existing technology to a larger or more complex clean-up operation than has previously been carried out. However, an entity does not anticipate the development of a completely new technology for cleaning up unless it is supported by sufficient objective evidence.

50 The effect of possible new legislation is taken into consideration in measuring an existing obligation when sufficient objective evidence exists that the legislation is virtually certain to be enacted. The variety of circumstances that arise in practice makes it impossible to specify a single event that will provide sufficient, objective evidence in every case. Evidence is required both of what legislation will demand and of whether it is virtually certain to be enacted and implemented in due course. In many cases sufficient objective evidence will not exist until the new legislation is enacted.

## Expected disposal of assets

**51 Gains from the expected disposal of assets shall not be taken into account in measuring a provision.**

52 Gains on the expected disposal of assets are not taken into account in measuring a provision, even if the expected disposal is closely linked to the event giving rise to the provision. Instead, an entity recognises gains on expected disposals of assets at the time specified by the Standard dealing with the assets concerned.

## Reimbursements

---

**53 Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement shall be recognised when, and only when, it is virtually certain that reimbursement will be received if the entity settles the obligation. The reimbursement shall be treated as a separate asset. The amount recognised for the reimbursement shall not exceed the amount of the provision.**

- 54 In the statement of comprehensive income, the expense relating to a provision may be presented net of the amount recognised for a reimbursement.**
- 55 Sometimes, an entity is able to look to another party to pay part or all of the expenditure required to settle a provision (for example, through insurance contracts, indemnity clauses or suppliers' warranties). The other party may either reimburse amounts paid by the entity or pay the amounts directly.
- 56 In most cases the entity will remain liable for the whole of the amount in question so that the entity would have to settle the full amount if the third party failed to pay for any reason. In this situation, a provision is recognised for the full amount of the liability, and a separate asset for the expected reimbursement is recognised when it is virtually certain that reimbursement will be received if the entity settles the liability.
- 57 In some cases, the entity will not be liable for the costs in question if the third party fails to pay. In such a case the entity has no liability for those costs and they are not included in the provision.
- 58 As noted in paragraph 29, an obligation for which an entity is jointly and severally liable is a contingent liability to the extent that it is expected that the obligation will be settled by the other parties.

## **Changes in provisions**

---

- 59 Provisions shall be reviewed at the end of each reporting period and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of resources embodying economic benefits will be required to settle the obligation, the provision shall be reversed.**
- 60 Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as borrowing cost.

## **Use of provisions**

---

- 61 A provision shall be used only for expenditures for which the provision was originally recognised.**
- 62 Only expenditures that relate to the original provision are set against it. Setting expenditures against a provision that was originally recognised for another purpose would conceal the impact of two different events.

## **Application of the recognition and measurement rules**

---

### **Future operating losses**

- 63 Provisions shall not be recognised for future operating losses.**
- 64 Future operating losses do not meet the definition of a liability in paragraph 10 and the general recognition criteria set out for provisions in paragraph 14.
- 65 An expectation of future operating losses is an indication that certain assets of the operation may be impaired. An entity tests these assets for impairment under HKAS 36 *Impairment of Assets*.

### **Onerous contracts**

- 66 If an entity has a contract that is onerous, the present obligation under the contract shall be recognised and measured as a provision.**

- 67 Many contracts (for example, some routine purchase orders) can be cancelled without paying compensation to the other party, and therefore there is no obligation. Other contracts establish both rights and obligations for each of the contracting parties. Where events make such a contract onerous, the contract falls within the scope of this Standard and a liability exists which is recognised. Executory contracts that are not onerous fall outside the scope of this Standard.
- 68 This Standard defines an onerous contract as a contract in which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under it. The unavoidable costs under a contract reflect the least net cost of exiting from the contract, which is the lower of the cost of fulfilling it and any compensation or penalties arising from failure to fulfil it.
- 68A The cost of fulfilling a contract comprises the costs that relate directly to the contract. Costs that relate directly to a contract consist of both:
- (a) the incremental costs of fulfilling that contract—for example, direct labour and materials; and
  - (b) an allocation of other costs that relate directly to fulfilling contracts—for example, an allocation of the depreciation charge for an item of property, plant and equipment used in fulfilling that contract among others.
- 69 Before a separate provision for an onerous contract is established, an entity recognises any impairment loss that has occurred on assets used in fulfilling the contract (see HKAS 36).

## Restructuring

- 70 The following are examples of events that may fall under the definition of restructuring:
- (a) sale or termination of a line of business;
  - (b) the closure of business locations in a country or region or the relocation of business activities from one country or region to another;
  - (c) changes in management structure, for example, eliminating a layer of management; and
  - (d) fundamental reorganisations that have a material effect on the nature and focus of the entity's operations.
- 71 A provision for restructuring costs is recognised only when the general recognition criteria for provisions set out in paragraph 14 are met. Paragraphs 72-83 set out how the general recognition criteria apply to restructurings.
- 72 A constructive obligation to restructure arises only when an entity:**
- (a) has a detailed formal plan for the restructuring identifying at least:**
    - (i) the business or part of a business concerned;**
    - (ii) the principal locations affected;**
    - (iii) the location, function, and approximate number of employees who will be compensated for terminating their services;**
    - (iv) the expenditures that will be undertaken; and**
    - (v) when the plan will be implemented; and**

- (b) **has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.**

- 73 Evidence that an entity has started to implement a restructuring plan would be provided, for example, by dismantling plant or selling assets or by the public announcement of the main features of the plan. A public announcement of a detailed plan to restructure constitutes a constructive obligation to restructure only if it is made in such a way and in sufficient detail (ie setting out the main features of the plan) that it gives rise to valid expectations in other parties such as customers, suppliers and employees (or their representatives) that the entity will carry out the restructuring.
- 74 For a plan to be sufficient to give rise to a constructive obligation when communicated to those affected by it, its implementation needs to be planned to begin as soon as possible and to be completed in a timeframe that makes significant changes to the plan unlikely. If it is expected that there will be a long delay before the restructuring begins or that the restructuring will take an unreasonably long time, it is unlikely that the plan will raise a valid expectation on the part of others that the entity is at present committed to restructuring, because the timeframe allows opportunities for the entity to change its plans.
- 75 A management or board decision to restructure taken before the end of the reporting period does not give rise to a constructive obligation at the end of the reporting period unless the entity has, before the end of the reporting period:
- (a) started to implement the restructuring plan; or
  - (b) announced the main features of the restructuring plan to those affected by it in a sufficiently specific manner to raise a valid expectation in them that the entity will carry out the restructuring.

If an entity starts to implement a restructuring plan, or announces its main features to those affected, only after the reporting period, disclosure is required under HKAS 10 *Events after the Reporting Period*, if the restructuring is material and non-disclosure could reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements, which provide financial information about a specific reporting entity.

- 76 Although a constructive obligation is not created solely by a management decision, an obligation may result from other earlier events together with such a decision. For example, negotiations with employee representatives for termination payments, or with purchasers for the sale of an operation, may have been concluded subject only to board approval. Once that approval has been obtained and communicated to the other parties, the entity has a constructive obligation to restructure, if the conditions of paragraph 72 are met.
- 77 In some countries, the ultimate authority is vested in a board whose membership includes representatives of interests other than those of management (e.g. employees) or notification to such representatives may be necessary before the board decision is taken. Because a decision by such a board involves communication to these representatives, it may result in a constructive obligation to restructure.
- 78 **No obligation arises for the sale of an operation until the entity is committed to the sale, ie there is a binding sale agreement.**
- 79 Even when an entity has taken a decision to sell an operation and announced that decision publicly, it cannot be committed to the sale until a purchaser has been identified and there is a binding sale agreement. Until there is a binding sale agreement, the entity will be able to change its mind and indeed will have to take another course of action if a purchaser cannot be found on acceptable terms. When the sale of an operation is envisaged as part of a restructuring, the assets of the operation are reviewed for impairment under HKAS 36. When a sale is only part

of a restructuring, a constructive obligation can arise for the other parts of the restructuring before a binding sale agreement exists.

**80 A restructuring provision shall include only the direct expenditures arising from the restructuring, which are those that are both:**

- (a) necessarily entailed by the restructuring; and**
- (b) not associated with the ongoing activities of the entity.**

**81 A restructuring provision does not include such costs as:**

- (a) retraining or relocating continuing staff;**
- (b) marketing; or**
- (c) investment in new systems and distribution networks.**

These expenditures relate to the future conduct of the business and are not liabilities for restructuring at the end of the reporting period. Such expenditures are recognised on the same basis as if they arose independently of a restructuring.

**82 Identifiable future operating losses up to the date of a restructuring are not included in a provision, unless they relate to an onerous contract as defined in paragraph 10.**

**83 As required by paragraph 51, gains on the expected disposal of assets are not taken into account in measuring a restructuring provision, even if the sale of assets is envisaged as part of the restructuring.**

## **Disclosure**

---

**84 For each class of provision, an entity shall disclose:**

- (a) the carrying amount at the beginning and end of the period;**
- (b) additional provisions made in the period, including increases to existing provisions;**
- (c) amounts used (ie incurred and charged against the provision) during the period;**
- (d) unused amounts reversed during the period; and**
- (e) the increase during the period in the discounted amount arising from the passage of time and the effect of any change in the discount rate.**

**Comparative information is not required.**

**85 An entity shall disclose the following for each class of provision:**

- (a) a brief description of the nature of the obligation and the expected timing of any resulting outflows of economic benefits;**
- (b) An indication of the uncertainties about the amount or timing of those outflows. Where necessary to provide adequate information, an entity shall disclose the major assumptions made concerning future events, as addressed in paragraph 48; and**
- (c) the amount of any expected reimbursement, stating the amount of any asset that has been recognised for that expected reimbursement.**

- 86 Unless the possibility of any outflow in settlement is remote, an entity shall disclose for each class of contingent liability at the end of the reporting period a brief description of the nature of the contingent liability and, where practicable:**
- (a) an estimate of its financial effect, measured under paragraphs 36-52;**
  - (b) an indication of the uncertainties relating to the amount or timing of any outflow; and**
  - (c) the possibility of any reimbursement.**
- 87 In determining which provisions or contingent liabilities may be aggregated to form a class, it is necessary to consider whether the nature of the items is sufficiently similar for a single statement about them to fulfil the requirements of paragraphs 85(a) and (b) and 86(a) and (b). Thus, it may be appropriate to treat as a single class of provision amounts relating to warranties of different products, but it would not be appropriate to treat as a single class amounts relating to normal warranties and amounts that are subject to legal proceedings.
- 88 Where a provision and a contingent liability arise from the same set of circumstances, an entity makes the disclosures required by paragraphs 84-86 in a way that shows the link between the provision and the contingent liability.
- 89 Where an inflow of economic benefits is probable, an entity shall disclose a brief description of the nature of the contingent assets at the end of the reporting period, and, where practicable, an estimate of their financial effect, measured using the principles set out for provisions in paragraphs 36-52.**
- 90 It is important that disclosures for contingent assets avoid giving misleading indications of the likelihood of income arising.
- 91 Where any of the information required by paragraphs 86 and 89 is not disclosed because it is not practicable to do so, that fact shall be stated.**
- 92 In extremely rare cases, disclosure of some or all of the information required by paragraphs 84-89 can be expected to prejudice seriously the position of the entity in a dispute with other parties on the subject matter of the provision, contingent liability or contingent asset. In such cases, an entity need not disclose the information, but shall disclose the general nature of the dispute, together with the fact that, and reason why, the information has not been disclosed.**

## Transitional provisions

---

- 93 [Not used]
- 94 [Not used]
- 94A *Onerous Contracts—Cost of Fulfilling a Contract*, issued in June 2020, added paragraph 68A and amended paragraph 69. An entity shall apply those amendments to contracts for which it has not yet fulfilled all its obligations at the beginning of the annual reporting period in which it first applies the amendments (the date of initial application). The entity shall not restate comparative information. Instead, the entity shall recognise the cumulative effect of initially applying the amendments as an adjustment to the opening balance of retained earnings or other component of equity, as appropriate, at the date of initial application.

## Effective date

---

- 95 This Standard becomes operative for annual financial statements covering periods beginning on or after 1 January 2005. Earlier application is encouraged.

- 96 This Standard supersedes SSAP 28 *Provisions, Contingent Liabilities and Contingent Assets* (issued in January 2001).
- 97 [Deleted]
- 98 [Deleted]
- 99 *Annual Improvements to HKFRSs 2010–2012 Cycle*, issued in January 2014, amended paragraph 5 as a consequential amendment derived from the amendment to HKFRS 3. An entity shall apply that amendment prospectively to business combinations to which the amendment to HKFRS 3 applies.
- 100 HKFRS 15 *Revenue from Contracts with Customers*, issued in July 2014, amended paragraph 5 and deleted paragraph 6. An entity shall apply those amendments when it applies HKFRS 15.
- 101 HKFRS 9, as issued in September 2014, amended paragraph 2 and deleted paragraphs 97 and 98. An entity shall apply those amendments when it applies HKFRS 9.
- 102 HKFRS 16, issued in May 2016, amended paragraph 5. An entity shall apply that amendment when it applies HKFRS 16.
- 103 *[This paragraph refers to amendments that are not yet effective, and is therefore not included in this edition.]*
- 104 *Definition of Material* (Amendments to HKAS 1 and HKAS 8), issued in January 2019, amended paragraph 75. An entity shall apply those amendments prospectively for annual periods beginning on or after 1 January 2020. Earlier application is permitted. If an entity applies those amendments for an earlier period, it shall disclose that fact. An entity shall apply those amendments when it applies the amendments to the definition of material in paragraph 7 of HKAS 1 and paragraphs 5 and 6 of HKAS 8.
- 105 *Onerous Contracts—Cost of Fulfilling a Contract*, issued in June 2020, added paragraphs 68A and 94A and amended paragraph 69. An entity shall apply those amendments for annual reporting periods beginning on or after 1 January 2022. Earlier application is permitted. If an entity applies those amendments for an earlier period, it shall disclose that fact.

## Appendix

### Comparison with International Accounting Standards

This comparison appendix, which was prepared as at October 2004 and deals only with significant differences in the standards extant, is produced for information only and does not form part of the standards in HKAS 37.

The International Accounting Standard comparable with HKAS 37 is IAS 37 *Provisions, Contingent Liabilities and Contingent Assets*.

There are no major textual differences between HKAS 37 and IAS 37.

*Note: Example 3A, 12 and 13 in the Implementation Guidance on HKAS 37 are additional Hong Kong examples. No comparable examples are included in the Implementation Guidance on IAS 37.*

## **BASIS FOR CONCLUSIONS ON IAS 37 PROVISIONS, CONTINGENT LIABILITIES AND CONTINGENT ASSETS**

*Onerous Contracts – Cost of Fulfilling a Contract* (Amendments to HKAS 37) is based on *Onerous Contracts – Cost of Fulfilling a Contract* (Amendments to IAS 37). In approving Amendments to HKAS 37, the Financial Reporting Standard Committee of the Hong Kong Institute of Certified Public Accountants considered and agreed with the IASB's Basis for Conclusions on Amendments to IAS 37. Accordingly, there are no significant differences between the Amendments to HKAS 37 and the Amendments to IAS 37. The IASB's Basis for Conclusions is reproduced below. The paragraph numbers of IAS 37 referred to below generally correspond with those in HKAS 37.

## **Basis for Conclusions on IAS 37 Provisions, Contingent Liabilities and Contingent Assets**

---

*This Basis for Conclusions accompanies, but is not part of, IAS 37. IAS 37 was issued by the International Accounting Standards Committee in 1998 and was not accompanied by a Basis for Conclusions. This Basis for Conclusions summarises the considerations of the International Accounting Standards Board (Board) in developing amendments to IAS 37. Individual Board members gave greater weight to some factors than to others.*

### **Onerous Contracts—Cost of Fulfilling a Contract (paragraph 68A)**

---

- BC1 In May 2020 the Board added paragraph 68A to IAS 37. Paragraph 68A specifies which costs an entity includes in determining the cost of fulfilling a contract for the purpose of assessing whether the contract is onerous. The Board added this clarification in response to a recommendation from the IFRS Interpretations Committee, whose research indicated that:
- (a) differing views on which costs to include could lead to material differences in the financial statements of entities that enter into some types of contracts.
  - (b) the need for clarification was urgent. Following the withdrawal of IAS 11 *Construction Contracts*, entities are required to apply IAS 37 instead of IAS 11 to assess whether construction contracts are onerous. IAS 11 specified which costs to include, but IAS 37 did not.

#### **The cost of fulfilling a contract**

- BC2 Views differed on what an entity should include in the cost of fulfilling a contract when assessing whether the contract is onerous—whether to include:
- (a) only the incremental costs of fulfilling the contract—for example, the cost of materials and labour required to construct a building; or
  - (b) all costs that relate directly to the contract—both the incremental costs and an allocation of other costs that relate directly to fulfilling contracts—for example, an allocation of the depreciation charge for an item of property, plant and equipment used in fulfilling the contract among others, or an allocation of the costs of management and supervision of contracts.
- BC3 The Board decided to require an entity to include all costs that relate directly to a contract. The Board concluded that:
- (a) including all such costs provides more useful information to users of the entity's financial statements (paragraphs BC4–BC7);
  - (b) the benefits of providing that information are likely to outweigh the costs (paragraphs BC8–BC9); and
  - (c) a requirement to include all costs that relate directly to a contract is consistent with other requirements in IAS 37 and requirements in other IFRS Standards (paragraphs BC10–BC13).

### Useful information

- BC4 An entity may obtain the resources it needs to fulfil a contract in different ways. For example, if an entity needs equipment to fulfil a contract to manufacture goods or provide services, it may either hire the equipment for use only on that contract, or buy the equipment and use it on several contracts. The Board concluded that to provide a faithful representation of the effect of a contract on an entity's financial position, the entity should identify the resources needed to fulfil the contract and include the cost of those resources, regardless of how it expects to obtain them. Including only incremental costs in that assessment—for example, the costs of hiring equipment but not an allocation of the depreciation of purchased equipment—would fail to recognise the costs of resources shared with other contracts.
- BC5 The Board considered contracts an entity will fulfil using existing assets with idle capacity. If the income from such a contract will exceed the incremental cost of fulfilling it, the contract will improve the entity's financial position and performance. But, unless the income will fully cover the cost of the capacity used, including that cost in assessing whether the contract is onerous might suggest otherwise because the entity will recognise an onerous contract provision and a loss when it incurs a present obligation by entering into the contract. If that capacity were not used to fulfil the contract, such a loss would not be recognised.
- BC6 The Board concluded that, even for a contract that will be fulfilled using existing idle capacity, including all costs that relate directly to the contract (that is, including the cost of the capacity used) provides useful information. By entering into a contract at a price that does not fully cover the cost of the capacity used, the entity has committed itself to using that capacity to provide goods or services at a price that would not be sustainable if all contracts were similarly priced. The entity has effectively committed itself to making a loss on that capacity for the life of the contract. In the Board's view, including the cost of the capacity used in assessing whether a contract is onerous provides information that is relevant to users of financial statements and faithfully represents the effect of the contract on the entity's financial position and performance. The Board noted that an entity would disclose additional information about the contract if such information is relevant to an understanding of the entity's financial statements.
- BC7 The Board also considered requirements in other IFRS Standards. Several IFRS Standards—such as IAS 2 *Inventories*—specify the costs to include in measuring a non-monetary asset. Although their detailed requirements differ, they all require an entity to include both the incremental costs of purchasing or constructing the asset, and an allocation of other directly related or directly attributable costs, such as production overheads. The Board concluded that, in assessing whether a contract to deliver goods is onerous, the way an entity determines the cost of fulfilling the contract should be broadly consistent with the way it measures the cost of the goods when it holds them. Such consistency leads to more useful information.

### Cost of applying the requirements

- BC8 The Board discussed suggestions that it might be costly for a manufacturing entity to estimate and allocate all the costs that relate directly to a contract if the entity has not yet manufactured the goods it will deliver under the contract.
- BC9 The Board noted that IAS 2 requires an entity to measure the cost of manufactured inventories at an amount that includes both the incremental costs of production and an allocation of production overheads. Further, a manufacturing entity that enters into contracts to supply inventory is likely to need information about these costs to make pricing decisions. Therefore, the entity is likely to have already the information it needs to estimate and allocate the costs that will relate directly to contracts into which it has entered. The Board therefore concluded that a requirement to estimate and allocate costs that relate directly to a contract would not impose costs that outweigh the usefulness of the information provided.

### Consistency with other requirements in IAS 37 and requirements in other IFRS Standards

- BC10 IAS 37 defines an onerous contract as ‘a contract in which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under it’. The Board concluded that the unavoidable costs of fulfilling a contract are the costs an entity cannot avoid because it *has* the contract (as opposed to the costs the entity could avoid if it *did not have* the contract). The costs an entity cannot avoid because it has a contract include both the incremental costs of that contract and an allocation of other costs that relate directly to fulfilling contracts, including that contract.
- BC11 The Board discussed whether including costs other than the incremental costs of fulfilling a contract would be inconsistent with other requirements in IAS 37. Those holding this view suggested that, because an entity will incur those other costs regardless of whether it fulfils the contract under consideration, the costs are not costs of ‘fulfilling the contract’—they are costs of operating the business. Paragraph 18 of IAS 37 specifies that no provision is recognised for costs that need to be incurred to operate in the future, and paragraph 63 prohibits recognition of future operating losses.
- BC12 However, the Board concluded that a requirement to include all costs that relate directly to a contract in assessing whether the contract is onerous is consistent with other requirements in IAS 37. It concluded that:
- (a) in recognising an onerous contract provision, an entity would not be recognising a provision for the costs themselves—that is, it would not be identifying those costs as present obligations in their own right. Instead, the entity would be recognising its present obligation to deliver goods or provide services in exchange for other economic benefits, measuring that obligation at an amount that includes the cost of all the resources to be used to fulfil the obligation.
  - (b) paragraph 63 of IAS 37 prohibits an entity from recognising future operating losses because such losses are not liabilities; in other words, the entity does not have a present obligation to incur those losses. In contrast, in assessing whether a contract is onerous, an entity determines the cost of fulfilling its present obligation under an existing contract. Therefore, including all costs that relate directly to a contract in assessing whether the contract is onerous does not result in an entity recognising future operating losses.
- BC13 The Board noted that a requirement to include all costs that relate directly to a contract is consistent with IFRS 17 *Insurance Contracts*. IFRS 17 requires insurers to include all costs that relate directly to the fulfilment of a contract in assessing whether an insurance contract is onerous. These costs include an allocation of fixed and variable overheads directly attributable to fulfilling insurance contracts.

### Examples

- BC14 When it exposed draft amendments for comment, the Board proposed to include a list of examples of costs that do and do not relate directly to a contract. These examples were based on paragraphs 97–98 of IFRS 15 *Revenue from Contracts with Customers*.

- BC15 Some respondents to the Board's draft amendments noted differences between the examples proposed and those in other IFRS Standards that specify which costs to include in measuring the cost of non-monetary assets. Those respondents asked the Board to clarify whether some costs mentioned in those other IFRS Standards would be regarded as costs that relate directly to the contract by an entity applying IAS 37. Respondents also asked the Board to provide examples of costs that relate directly to contracts other than contracts to deliver goods or provide services.
- BC16 In response to this feedback, the Board decided to replace the list of examples with a more general description of the types of costs that relate directly to a contract—that is, the incremental costs of fulfilling the contract and an allocation of other costs that relate directly to fulfilling contracts. The Board concluded that the more general description:
- (a) can be applied to all types of contract, rather than only to contracts to deliver goods or provide services;
  - (b) avoids unintended consequences of slight differences in the wording of examples in different IFRS Standards; and
  - (c) provides a framework within which an entity can judge whether a particular cost relates directly to a contract.

### **Interaction with requirements for impaired assets**

- BC17 Paragraph 69 of IAS 37 requires that, before an entity establishes a provision for an onerous contract, the entity recognises any impairment loss that has occurred on assets 'used in fulfilling the contract'. Paragraph 69 originally referred to assets 'dedicated to that contract'. However, the term 'dedicated' could be read to apply only to assets used solely on that contract, and not used on other contracts. The Board amended the terminology in paragraph 69 to clarify that the requirement to recognise any impairment loss before establishing an onerous contract provision applies to all assets whose cost would be considered in assessing whether the contract is onerous.

### **Scope**

- BC18 Some respondents to the Board's draft amendments asked the Board to expand the scope of the project to clarify other aspects of the onerous contract requirements in IAS 37, such as:
- (a) measuring onerous contracts—whether an entity would consider the same costs in measuring a provision for an onerous contract as it would consider in assessing whether that contract is onerous.
  - (b) selecting a unit of account—whether, and if so when, an entity should combine groups of similar contracts or segment contracts into components when applying the onerous contract requirements.
- BC19 The Board decided not to consider other aspects of the onerous contract requirements in IAS 37 because doing so would have prolonged the project, delaying the issue of amendments regarded as urgent (see paragraph BC1(b)). The amendments therefore do not change the requirements in IAS 37 beyond clarifying the costs an entity is required to include in assessing whether a contract is onerous.

## Transitional provisions

- BC20 On transition entities are required to apply the amendments only to contracts for which the entity has not fulfilled all its obligations at the date of initial application, without restating comparative amounts. The Board concluded that it may be difficult and costly for an entity to obtain the information needed to restate comparative amounts, and the information provided by doing so was unlikely to be sufficiently useful to justify the costs that the entity might incur.
- BC21 The Board decided not to provide entities with an option to restate comparative amounts—that is, not to provide the option of retrospective application, as defined in IAS 8 *Accounting Policies, Changes in Accounting Estimates and Errors*. The Board concluded that the benefits of providing that option would be limited, and would be outweighed by the complexity and possible loss of comparability between the financial statements of entities applying the amendments at their effective date.

## Guidance on Implementing IAS 37 *Provisions, Contingent Liabilities and Contingent Assets*

*This guidance accompanies, but is not part of, IAS 37.*

### A Tables - Provisions, contingent liabilities, contingent assets and reimbursements

*The purpose of these tables is to summarise the main requirements of the Standard.*

#### Provisions and contingent liabilities

<b>Where, as a result of past events, there may be an outflow of resources embodying future economic benefits in settlement of: (a) a present obligation; or (b) a possible obligation whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity.</b>		
<b>There is a present obligation that probably requires an outflow of outflow resources.</b>	<b>There is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources.</b>	<b>There is a possible obligation or a present obligation where the likelihood of an outflow of resources is remote.</b>
A provision is recognised (paragraph 14).	No provision is recognised (paragraph 27).	No provision is recognised (paragraph 27).
Disclosures are required for the provision (paragraphs 84 and 85).	Disclosures are required for the contingent liability (paragraph 86).	No disclosure is required (paragraph 86).

A contingent liability also arises in the extremely rare case where there is a liability that cannot be recognised because it cannot be measured reliably. Disclosures are required for the contingent liability.

#### Contingent assets

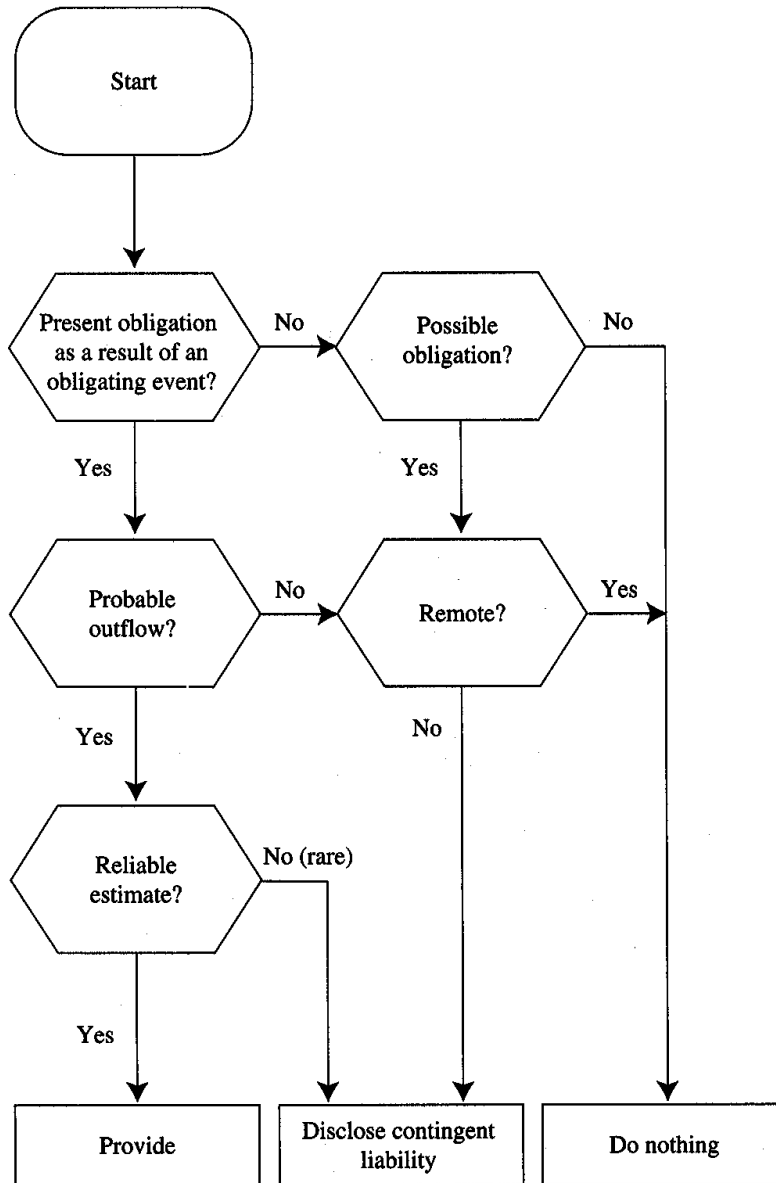

<b>Where, as a result of past events, there is a possible asset whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity.</b>		
<b>The inflow of economic benefits is virtually certain.</b>	<b>The inflow of economic benefits is probable, but not virtually certain.</b>	<b>The inflow is not probable.</b>
The asset is not contingent (paragraph 33).	No asset is recognised (paragraph 31).	No asset is recognised (paragraph 31).
	Disclosures are required (paragraph 89).	No disclosure is required (paragraph 89).

## Reimbursements

<b>Some or all of the expenditure required to settle a provision is expected to be reimbursed by another party.</b>		
<b>The entity has the obligation for the part of the expenditure to be reimbursed by the other party.</b>	<b>The obligation for the amount expected to be reimbursed remains with the entity and it is virtually certain that reimbursement will be received if the entity settles the provision.</b>	<b>The obligation for the amount expected to be reimbursed remains with the entity and the reimbursement is not virtually certain if the entity settles the provision.</b>
The entity has no liability for the amount to be reimbursed (paragraph 57).	The reimbursement is recognised as a separate asset in the statement of financial position and may be offset against the expense in the statement of comprehensive income. The amount recognised for the expected reimbursement does not exceed the liability (paragraphs 53 and 54).	The expected reimbursement is not recognised as an asset (paragraph 53).
No disclosure is required.	The reimbursement is disclosed together with the amount recognised for the reimbursement (paragraph 85(c)).	The expected reimbursement is disclosed (paragraph 85(c)).

## B Decision tree

The purpose of this diagram is to summarise the main recognition requirements of the Standard for provisions and contingent liabilities.

Note: in rare cases, it is not clear whether there is a present obligation. In these cases, a past event is deemed to give rise to a present obligation if, taking account of all available evidence, it is more likely than not that a present obligation exists at the end of the reporting period (paragraph 15 of the Standard).

## C Examples: recognition

*All the entities in the examples have 31 December year-ends. In all cases, it is assumed that a reliable estimate can be made of any outflows expected. In some examples the circumstances described may have resulted in impairment of the assets - this aspect is not dealt with in the examples.*

*The cross-references provided in the examples indicate paragraphs of the Standard that are particularly relevant.*

*References to "best estimate" are to the present value amount, where the effect of the time value of money is material.*

### Example 1 Warranties

A manufacturer gives warranties at the time of sale to purchasers of its product. Under the terms of the contract for sale the manufacturer undertakes to make good, by repair or replacement, manufacturing defects that become apparent within three years from the date of sale. On past experience, it is probable (ie more likely than not) that there will be some claims under the warranties.

**Present obligation as a result of a past obligating event** - The obligating event is the sale of the product with a warranty, which gives rise to a legal obligation.

**An outflow of resources embodying economic benefits in settlement** - Probable for the warranties as a whole (see paragraph 24).

**Conclusion** - A provision is recognised for the best estimate of the costs of making good under the warranty products sold before the end of the reporting period (see paragraphs 14 and 24).

### Example 2A Contaminated land - legislation virtually certain to be enacted

An entity in the oil industry causes contamination but cleans up only when required to do so under the laws of the particular country in which it operates. One country in which it operates has had no legislation requiring cleaning up, and the entity has been contaminating land in that country for several years. At 31 December 20X0 it is virtually certain that a draft law requiring a clean-up of land already contaminated will be enacted shortly after the year-end.

**Present obligation as a result of a past obligating event** - The obligating event is the contamination of the land because of the virtual certainty of legislation requiring cleaning up.

**An outflow of resources embodying economic benefits in settlement** - Probable.

**Conclusion** - A provision is recognised for the best estimate of the costs of the clean-up (see paragraphs 14 and 22).

### Example 2B Contaminated land and constructive obligation

An entity in the oil industry causes contamination and operates in a country where there is no environmental legislation. However, the entity has a widely published environmental policy in which it undertakes to clean up all contamination that it causes. The entity has a record of honouring this published policy.

**Present obligation as a result of a past obligating event** - The obligating event is the contamination of the land, which gives rise to a constructive obligation because the conduct of the entity has created a valid expectation on the part of those affected by it that the entity will clean up contamination.

**An outflow of resources embodying economic benefits in settlement - Probable.**

**Conclusion** - A provision is recognised for the best estimate of the costs of clean-up (see paragraphs 10 (the definition of a constructive obligation), 14 and 17).

### Example 3 Offshore oilfield

An entity operates an offshore oilfield where its licensing agreement requires it to remove the oil rig at the end of production and restore the seabed. Ninety per cent of the eventual costs relate to the removal of the oil rig and restoration of damage caused by building it, and 10 per cent arise through the extraction of oil. At the end of the reporting period, the rig has been constructed but no oil has been extracted.

**Present obligation as a result of a past obligating event** - The construction of the oil rig creates a legal obligation under the terms of the licence to remove the rig and restore the seabed and is thus an obligating event. At the end of the reporting period, however, there is no obligation to rectify the damage that will be caused by extraction of the oil.

**An outflow of resources embodying economic benefits in settlement - Probable.**

**Conclusion** - A provision is recognised for the best estimate of ninety per cent of the eventual costs that relate to the removal of the oil rig and restoration of damage caused by building it (see paragraph 14). These costs are included as part of the cost of the oil rig. The ten per cent of costs that arise through the extraction of oil are recognised as a liability when the oil is extracted.

### Example 3A Reinstatement of premises

An entity leases office premises where its lease requires it to reinstate the premises at the end of the lease. The eventual costs relate to the restoration of the alterations made to the premises. At the end of the reporting period, certain alterations have been made to the premises but the premises have not been put into use.

**Present obligation as a result of a past obligating event** - The making of the alterations creates a legal obligation under the terms of the lease to restore the alterations made to the premises and is thus an obligating event. At the end of the reporting period, however, there is no obligation to rectify the wear and tear that will be caused by the use of the premises.

**An outflow of resources embodying economic benefits in settlement - Probable.**

**Conclusion** - A provision is recognised for the best estimate of the eventual costs that relate to the restoration of the alterations made to the premises (see paragraph 14). These costs are included as part of the cost of the alterations.

### Example 4 Refunds policy

A retail store has a policy of refunding purchases by dissatisfied customers, even though it is under no legal obligation to do so. Its policy of making refunds is generally known.

**Present obligation as a result of a past obligating event** - The obligating event is the sale of the product, which gives rise to a constructive obligation because the conduct of the store has created a valid expectation on the part of its customers that the store will refund purchases.

**An outflow of resources embodying economic benefits in settlement - Probable,** a proportion of goods are returned for refund (see paragraph 24).

**Conclusion** - A provision is recognised for the best estimate of the costs of refunds (see paragraphs 10 (the definition of a constructive obligation), 14, 17 and 24).

### Example 5A Closure of a division - no implementation before end of the reporting period

On 12 December 20X0 the board of an entity decided to close down a division. Before the end of the reporting period (31 December 20X0) the decision was not communicated to any of those affected and no other steps were taken to implement the decision.

**Present obligation as a result of a past obligating event** - There has been no obligating event and so there is no obligation.

**Conclusion** - No provision is recognised (see paragraphs 14 and 72).

### Example 5B Closure of a division - communication/implementation before end of the reporting period

On 12 December 20X0 the board of an entity decided to close down a division making a particular product. On 20 December 20X0 a detailed plan for closing down the division was agreed by the board; letters were sent to customers warning them to seek an alternative source of supply and redundancy notices were sent to the staff of the division.

**Present obligation as a result of a past obligating event** - The obligating event is the communication of the decision to the customers and employees, which gives rise to a constructive obligation from that date, because it creates a valid expectation that the division will be closed.

**An outflow of resources embodying economic benefits in settlement** - Probable.

**Conclusion** - A provision is recognised at 31 December 20X0 for the best estimate of the costs of closing the division (see paragraphs 14 and 72).

### Example 6 Legal requirement to fit smoke filters

Under new legislation, an entity is required to fit smoke filters to its factories by 30 June 20X1. The entity has not fitted the smoke filters.

(a) At 31 December 20X0, the end of the reporting period

**Present obligation as a result of a past obligating event** - There is no obligation because there is no obligating event either for the costs of fitting smoke filters or for fines under the legislation.

**Conclusion** - No provision is recognised for the cost of fitting the smoke filters (see paragraphs 14 and 17-19).

(b) At 31 December 20X1, the end of the reporting period

**Present obligation as a result of a past obligating event** - There is still no obligation for the costs of fitting smoke filters because no obligating event has occurred (the fitting of the filters). However, an obligation might arise to pay fines or penalties under the legislation because the obligating event has occurred (the non-compliant operation of the factory).

**An outflow of resources embodying economic benefits in settlement** - Assessment of probability of incurring fines and penalties by non-compliant operation depends on the details of the legislation and the stringency of the enforcement regime.

**Conclusion** - No provision is recognised for the costs of fitting smoke filters. However, a provision is recognised for the best estimate of any fines and penalties that are more likely than not to be imposed (see paragraphs 14 and 17-19).

### Example 7 Staff retraining as a result of changes in the income tax system

The government introduces a number of changes to the income tax system. As a result of these changes, an entity in the financial services sector will need to retrain a large proportion of its administrative and sales workforce in order to ensure continued compliance with financial services regulation. At the end of the reporting period, no retraining of staff has taken place.

**Present obligation as a result of a past obligating event** - There is no obligation because no obligating event (retraining) has taken place.

**Conclusion** - No provision is recognised (see paragraphs 14 and 17-19).

### Example 8 An onerous contract

[Deleted]

### Example 9 A single guarantee

[Deleted]

### Example 10 A court case

After a wedding in 20X0, ten people died, possibly as a result of food poisoning from products sold by the entity. Legal proceedings are started seeking damages from the entity but it disputes liability. Up to the date of authorisation of the financial statements for the year to 31 December 20X0 for issue, the entity's lawyers advise that it is probable that the entity will not be found liable. However, when the entity prepares the financial statements for the year to 31 December 20X1, its lawyers advise that, owing to developments in the case, it is probable that the entity will be found liable.

(a) At 31 December 20X0

**Present obligation as a result of a past obligating event** - On the basis of the evidence available when the financial statements were approved, there is no obligation as a result of past events.

**Conclusion** - No provision is recognised (see paragraphs 15 and 16). The matter is disclosed as a contingent liability unless the probability of any outflow is regarded as remote (paragraph 86).

(b) At 31 December 20X1

**Present obligation as a result of a past obligating event** - On the basis of the evidence available, there is a present obligation.

**An outflow of resources embodying economic benefits in settlement** - Probable.

**Conclusion** - A provision is recognised for the best estimate of the amount to settle the obligation (paragraphs 14-16).

### Example 11 Repairs and maintenance

Some assets require, in addition to routine maintenance, substantial expenditure every few years for major refits or refurbishment and the replacement of major components. IAS 16 *Property, Plant and Equipment* gives guidance on allocating expenditure on an asset to its component parts where these components have different useful lives or provide benefits in a different pattern.

### Example 11A Refurbishment costs - no legislative requirement

A furnace has a lining that needs to be replaced every five years for technical reasons. At the end of the reporting period, the lining has been in use for three years.

**Present obligation as a result of a past obligating event** - There is no present obligation.

**Conclusion** - No provision is recognised (see paragraphs 14 and 17-19).

The cost of replacing the lining is not recognised because, at the end of the reporting period, no obligation to replace the lining exists independently of the company's future actions - even the intention to incur the expenditure depends on the company deciding to continue operating the furnace or to replace the lining. Instead of a provision being recognised, the depreciation of the lining takes account of its consumption, i.e. it is depreciated over five years. The re-lining costs then incurred are capitalised with the consumption of each new lining shown by depreciation over the subsequent five years.

### Example 11B Refurbishment costs - legislative requirement

An airline is required by law to overhaul its aircraft once every three years.

**Present obligation as a result of a past obligating event** - There is no present obligation.

**Conclusion** - No provision is recognised (see paragraphs 14 and 17-19)

The costs of overhauling aircraft are not recognised as a provision for the same reasons as the cost of replacing the lining is not recognised as a provision in example 11A. Even a legal requirement to overhaul does not make the costs of overhaul a liability, because no obligation exists to overhaul the aircraft independently of the entity's future actions - the entity could avoid the future expenditure by its future actions, for example by selling the aircraft. Instead of a provision being recognised, the depreciation of the aircraft takes account of the future incidence of maintenance costs, ie an amount equivalent to the expected maintenance costs is depreciated over three years.

### Example 12 Self insurance

An entity that operates a chain of retail outlets decides not to insure itself in respect of the risk of minor accidents to its customers: instead it will "self insure". Based on its past experience, it expects to pay \$1,500,000 a year in respect of these accidents. Should provision be made for the amount expected to arise in a normal year?

**Present obligation as a result of a past obligating event** - There is no present obligation, unless an accident has occurred or, taking into account all available evidence, is considered more likely than not to have occurred, on or before the end of the reporting period.

**Conclusion** - No provision is recognised for accidents which have not occurred on or before the end of the reporting period. There is no present obligation because there is no other party involved in insuring the risks (see paragraph 20). Therefore, a provision is not set up simply based on average annual past claims. However, for those accidents which, taking into account all available evidence, are considered more likely than not to have occurred on or before the end of the reporting period, it would be appropriate to make a provision (see paragraphs 15 and 36). In making such estimates, it is necessary to consider at the time of approving the accounts, the likelihood that there remain any incidents that occurred on or before the end of the reporting period, which have not yet been reported to the entity (i.e. claims incurred but not yet reported (IBNR)). The provisions shall be adjusted accordingly (see paragraph 38).

### **Example 13 - Building management ordinance**

The Hong Kong Building Management Ordinance S20(2) suggests the (Owners) Corporation to consider establishing a contingency fund to provide for any expenditure of an unexpected or urgent nature. In line with the above, a Maintenance and Repair Fund is normally established by a property management company in order to provide funds for the estimated cost of anticipated maintenance, redecoration and repair works which will be undertaken in the foreseeable future on the premises. Should the property management company recognise a provision for such repairs and maintenance in the financial statements?

**Present obligation as the result of a past obligating event** - There is no present obligation.

**Conclusion** - No provision is recognised (see paragraphs 14 and 17-19). However, this Standard neither encourages nor prohibits the segregation of funds to meet future obligations as suggested by the Building Management Ordinance.

## D Examples: disclosures

Two examples of the disclosures required by paragraph 85 are provided below.

### Example 1 Warranties

A manufacturer gives warranties at the time of sale to purchasers of its three product lines. Under the terms of the warranty, the manufacturer undertakes to repair or replace items that fail to perform satisfactorily for two years from the date of sale. At the end of the reporting period, a provision of \$60,000 has been recognised. The provision has not been discounted as the effect of discounting is not material. The following information is disclosed:

*A provision of \$60,000 has been recognised for expected warranty claims on products sold during the last three financial years. It is expected that the majority of this expenditure will be incurred in the next financial year, and all will be incurred within two years after the reporting period.*

### Example 2 Decommissioning Costs

In 2000, an entity involved in nuclear activities recognises a provision for decommissioning costs of \$300 million. The provision is estimated using the assumption that decommissioning will take place in 60-70 years' time. However, there is a possibility that it will not take place until 100-110 years' time, in which case the present value of the costs will be significantly reduced. The following information is disclosed:

*A provision of \$300 million has been recognised for decommissioning costs. These costs are expected to be incurred between 2060 and 2070; however, there is a possibility that decommissioning will not take place until 2100-2110. If the costs were measured based upon the expectation that they would not be incurred until 2100-2110 the provision would be reduced to \$136 million. The provision has been estimated using existing technology, at current prices, and discounted using a real discount rate of 2 per cent.*

An example is given below of the disclosures required by paragraph 92 where some of the information required is not given because it can be expected to prejudice seriously the position of the entity.

### Example 3 Disclosure Exemption

An entity is involved in a dispute with a competitor, who is alleging that the entity has infringed patents and is seeking damages of \$100 million. The entity recognises a provision for its best estimate of the obligation, but discloses none of the information required by paragraphs 84 and 85 of the Standard. The following information is disclosed:

*Litigation is in process against the company relating to a dispute with a competitor who alleges that the company has infringed patents and is seeking damages of \$100 million. The information usually required by IAS 37 Provisions, Contingent Liabilities and Contingent Assets is not disclosed on the grounds that it can be expected to prejudice seriously the outcome of the litigation. The directors are of the opinion that the claim can be successfully resisted by the company.*
