9.14 Chapter Summary

In this chapter, we will cover the following Learning Outcomes:

Learning Outcomes	LP
Principles of consolidation:	
Identify and describe the concept of a group as a single	26
economic entity	
Define a subsidiary and when a group should start and	26
stop consolidating a subsidiary	
Explain what constitutes control and the impact of	26
potential voting rights	
Describe the reasons why the directors of a company	26
may not want to consolidate a subsidiary and the	
circumstances in which non-consolidation is permitted	
Explain the purpose of consolidated financial statements	26
Explain the importance of eliminating intra-group	26
transactions	
Explain the importance of uniform accounting policies	26
and coterminous year ends in the preparation of	
consolidated accounts	
Apply the appropriate accounting treatment of	26
consolidated goodwill	
Explain how to account for changes in parent's	26
ownership interest in a subsidiary without losing control	
Acquisition of subsidiaries:	
Prepare a consolidated statement of financial position for	27
a simple/complex group structure including pre and post	
acquisition profits. Non-controlling interests and goodwill	
Prepare a consolidated statement of comprehensive	27
income for a simple/complex group structure, dealing	
with an acquisition and the non-controlling interest	

Disposal of subsidiaries:		
Account for the disposal of a subsidiary by a group	27	
Account for the change in ownership without loss of control	27	
Business combinations:		
Explain the scope of business combinations in accordance	26	
with HKFRS 3		
Identify business combination and the difference between	26	
asset and business		
Determine the acquisition date of an acquisition	26	
Identify the identifiable assets (including intangibles) and	26	
liabilities acquired in a business combination		
Explain the recognition principle and measurement basis of	26	
identifiable assets and liabilities and the exception		
Explain what contingent consideration is and how to account	26	
for it initially and subsequently		
Explain how to account for acquisition-related costs,	26	
including those related to issue debt or equity securities		
Determine what is part of the business combination	26	
transaction and the consideration		
Calculate goodwill (including bargain purchase) and account	26	
for it		
Explain the accounting for step acquisition	26	
Account for non-controlling interest when the subsidiary	26	
have negative equity balance		
Explain and account for measurement period adjustments	26	
Investments in associates:		
Define an associate in accordance with HKAS 28 (2011)	28	
Explain what significant influence is and apply the principle	28	
Explain the reasons for and impact of equity accounting,	28	
including notional purchase price allocation on initial		
acquisition, fair value adjustments, upstream and		
downstream transactions, and uniform accounting policies		
Account for investors' share of losses of an associate in	28	
excess of its investments in associates		
Explain the impairment test and related treatments for28		
investments in associates		
Account for disposal of an associate	28	
Prepare the disclosure in respect of associates 28		

Interests in joint arrangements:	
Define joint arrangements in accordance with HKFRS 11	28
Explain the difference among jointly controlled	28
operations and joint ventures	
Explain how an entity should account for a joint venture	28
Account for the transactions between a venturer and a	28
joint venture	
Disclose the relevant information in the venturer's	28
financial statements	
Consolidated financial statement preparation:	
Prepare a consolidated statement of financial position in	27
accordance with HKFRS 10	
Prepare a consolidated statement of comprehensive	27
income	
Prepare a consolidated statement of cash flows	19
Financial statement disclosure requirement:	
Disclose the relevant information for business	26
combinations occurred during and subsequent to the	
reporting period	
Merger accounting for common control combinations:	
Describe the principles and practices of merger	29
accounting	
Apply merger accounting to a common control	29
combination	
The effects of changes in foreign exchange rates:	
Determine the functional currency of an entity in	30
accordance with HKAS 21	
Translate foreign operation financial statements to the	30
presentation currency	
Account for foreign currency transactions within an	30
individual company and in the consolidated financial	
statements	
Account for disposal or partial disposal of a foreign	30
operation	

This is a lengthy chapter and covered a number of accounting standards having said, many areas in this chapter are frequently examined. Readers are encouraged to study this chapter thoroughly.

The flow of this chapter is as follows:

EARNINGMEDIA

- Determine the classification of an investment (i.e. subsidiary, associate, joint venture) [Financial instruments are discussed in Chapter 10]
- Based on the classification, adopt relevant accounting methods (i.e. acquisition accounting/line-by-line consolidation, equity accounting etc)
- Prepare consolidated balance sheet and income statement using consolidation adjustments
- Discuss the accounting treatment in separate F/S
- Examine more complex group accounting issues (e.g. step acquisitions and disposals, common control combinations, distributions to owners)
- Prepare consolidated statement of cash flows
- Disclosure of group accounting
- Examine the accounting treatments of foreign currency translations and consolidation of foreign subsidiaries

The overall mindmap of this chapter is as follows:

Overall Mindmap of Group Accounting Conso. Exemption? Common Control AG 5 - Power, Variable Returns & Ability Merger Accounting Investment Entity? Combination De Facto Control (9.1.3) (9.8) No additional Goodwill Step Disposals - Principal vs Agent -Ĥ---Subsidiary Control? 9.1 Basics of Subsidiaries

Reference: HKFRS 10 *Consolidated Financial Statements* (Revised December 2012)

- applicable for annual periods beginning on or after 1 January 2013
- earlier application is encouraged

HKFRS 10 refines the definition of control (previously addressed by HKAS 27 (Revised) *Consolidated and Separate Financial Statements* and HK(SIC)-Int 12 *Consolidation – Special Purpose Entities*). As a result of the issuance of HKFRS 10, HKAS 27 (Revised) and HK(SIC)-Int 12 are superseded.

[Note on transition: On year of adoption, HKFRS 10 should be applied retrospectively unless impracticable.

Typically, retrospective adjustments are not needed when the investee is assessed to be consolidated under both HKFRS 10 and the previous guidance in HKAS 27 (Revised) and HK(SIC)-Int 12. However, if the consolidation conclusion under HKFRS 10 differs from HKAS 27 (Revised) and HK(SIC)-Int 12, the retrospective adjustment should be made to the annual period immediately preceding the date of initial application of HKFRS 10.]

Control is an important concept because it forms the basis for line-by-line consolidation. Also, the assessment of control is always the starting point of classification of investment in an investee.

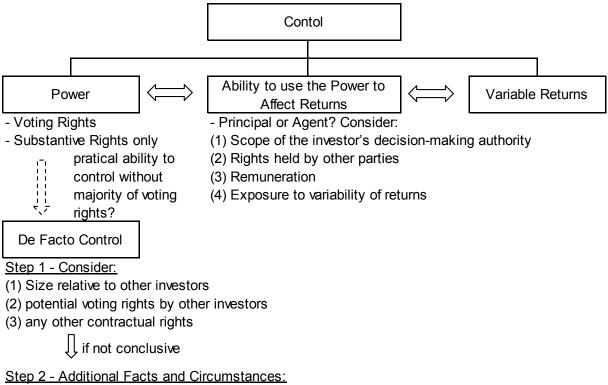

MA Chapter 9 (HKFRS 3 (Revised), HKFRS 10, HKFRS 11, HKAS 28, HKFRS 12, HKAS 7, HKAS21)

The mindmap of HKFRS 10 on control is as follows:

Mindmap of HKFRS 10 on Control

- (1) Voting pattern at previous meetings
- (2) Other facts that suggest the contrary

9.1.1 Control

The key change in control assessment from HKAS 27 (Revised) is that HKFRS 10 does not depend on "50% line" of ownership.

Control requires that three factors be present. An investor must have <u>all</u> of the following [HKFRS 10 para 7]:

<u>ح</u>	
Factor	Remarks
Power over the	An investor has power over an investee when the investor has
investee	existing rights that give it the current ability to direct the
	relevant activities (i.e. the activities that significantly affect the
[HKFRS 10 para	investee's returns). In most cases, voting rights is the key
10, B22, B27]	factor.
	For the purpose of assessing power, only substantive rights
	should be considered. For a right to be substantive, the holder
	must have the practical ability to exercise that right.
	An investor that holds only protective rights cannot have power
	or prevent another party from having power over an investee.
Exposure or	An investor is exposed, or has rights, to variable returns from its
Rights to Variable	involvement with the investee when the investor's returns from
Returns from its	its involvement have the potential to vary as a result of the
involvement with	investee's performance.
the investee	
	The investor's returns can be only positive, only negative or
[HKFRS 10 para	both positive and negative.
15]	(Note: This explains why a subsidiary should still be
	consolidated even if it is loss-making.)
Ability to use its	An investor controls an investee if the investor not only has
Power to affect the	power over the investee and exposure or rights to variable
amount of returns	returns from its involvement with the investee, but also has the
	ability to use its power to affect the investor's returns from its
[HKFRS 10 para	involvement with the investee.
17 & 18]	
	Thus, an investor with decision-making rights shall determine
	whether it is a principal or an agent (see next Section).

Note: There can only be 1 controlling party.

The assessment of control is performed on a continuous basis. The investor should reassess whether it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control above.

[HKFRS 10 para 8]

9.1.1.1 Principal vs Agent

The assessment of control may be straight-forward in most situations (e.g. holding 100% or majority of interest in the investee), but it is not always the case. For example, imagine a situation where the investor can direct how the investee operates and earn a fee in return but the ownership % in the investee is only minimal (say, 2%). Does control exist? If so, on what basis can we say a 2% investor has control over the remaining 98% investor?

The above example is a typical situation of a fund (asset) manager. In this situation, we should look into the investor's ability to its power to affect its returns in greater details by assessing whether the investor is an agent or principal.

For asset managers in investment funds:

- The manager generally has some degree of power (through the management agreement) and some exposure to variable returns (through fees for services and any ownership interests held)
- But the asset manager's degree of power does not generally change with its exposure to variable returns.
- This is in contrast with an entity's investment in another entity's ordinary shares, where there is generally a direct link between the number of shares held, the power that those shares confer and the share of residual returns that the investor is exposed to.

An agent is a party primarily engaged to act on behalf and for the benefit of another party or parties (i.e. the principal(s)) and therefore does not control the investee when it exercises its decision-making authority. [HKFRS 10 para B58]

In nutshell, if the investor is:

- Agent (i.e. on behalf of others): No control
- Principal (i.e. for itself): Control

In assessing whether the entity (as decision-maker of the investee) is an agent, it should consider the all of the following:

Factors	Remarks
Scope of the	The scope of a decision maker's decision-making authority is
investor's	evaluated by considering:
decision-making	 the activities that are permitted according to the
authority	decision-making agreement(s) and specified by law; and
	 the discretion that the decision maker has when making
[HKFRS 10 para	decisions about those activities.
B62]	
Rights held by	This focuses on whether there are any restrictions on decision
other parties	maker's powers (e.g. rights to remove the decision-maker by
	other investors).
[HKFRS 10 para	
B64]	Substantive rights held by other parties may affect the decision
	maker's ability to direct the relevant activities of an investee.
	Substantive removal may indicate that the decision maker is an
	agent.
Remuneration to	The greater the magnitude of, and variability associated with, the
which it is	decision maker's remuneration relative to the returns expected
entitled	from the activities of the investee, the more likely the decision
	maker is a principal.
[HKFRS para	
B71]	(In practice, asset managers are entitled to receive a
	management fee and/or performance fee.)
Exposure to	A decision maker that holds other interests in an investee (e.g.
variability of	investments in the investee or provides guarantees with respect to
returns	the performance of the investee) may indicate that the
	decision-maker may be a principal.
[HKFRS 10 para	
B71 & B72]	The greater the magnitude of, and variability associated with, its
	economic interests, considering its remuneration and other
	interests in aggregate, the more likely the decision maker is a
	principal.

It can be seen that HKFRS 10 does not draw a clear line – the assessment of agent/principal involves judgement and should take into account of all the facts and circumstances in the specific case.

9.1.1.2 De Facto Control

The concept of de facto control is newly introduced by HKFRS 10.

Think about one question: As a major shareholder of a listed company, do you think you really need 50% voting power in order to control the company in substance? Arguably, the answer is probably no but it also depends on some other facts.

Aspects	Remarks
Principle of De	An investor with less than a majority of the voting rights has rights
Facto Control	that are sufficient to give it power when the investor has the
	practical ability to direct the relevant activities unilaterally.
[HKFRS 10 para	(i.e. whether an investor's voting rights are sufficient to give it
B41]	power)
Factors to	In assessing de facto control, the investor should consider all
Consider	facts and circumstance, including:
	 the size of the investor's holding of voting rights relative to the
[HKFRS 10 para	size and dispersion of holdings of the <u>other vote holders</u> (see
B42]	Note 1)
	 potential voting rights held by the investor, other vote holders
	or other parties
	 rights arising from <u>other contractual arrangements</u>
	Note 1: Relative to Other Investors
	 the more <u>voting rights an investor holds</u>, the more likely the
	investor is to have existing rights that give it the current ability
	to direct the relevant activities
	 the more <u>voting rights an investor holds relative to other vote</u>
	holders, the more likely the investor is to have existing rights
	that give it the current ability to direct the relevant activities
	 the more <u>parties that would need to act together to outvote</u>
	the investor, the more likely the investor is to have existing
	rights that give it the current ability to direct the relevant
	activities
	(It can be interpreted that the above focuses on what the other
	investors have rather than what the entity has.)

Additional	In some cases, the factors in the above box may not be
Factors to	conclusive.
Consider	
	If so, the entity should consider additional facts and
[HKFRS 10 para	circumstances, such as:
B18-20; B45]	 whether other shareholders are passive in nature as
	demonstrated by voting patterns at previous shareholders'
	meetings
	 whether the investor has the practical ability to direct the
	relevant activities unilaterally
	 whether the investor has a special relationship with the
	investee, which suggests that the investor may have more
	than a passive interest in the investee
	 whether the investor is exposed to, or has rights to, a large
	exposure to variability of returns which indicates that the
	investor may have power

9.1.2 Principles of Consolidation

Once control is established, the subsidiary should be consolidated using the following principles:

Aspects	Remarks
Basic [HKFRS 10 para B86]	 Combine like items of assets, liabilities, equity, income, expenses and cash flows of the parent with those of its subsidiaries Offset (eliminate) the carrying amount of the parent's investment in each subsidiary and the parent's portion of equity of each subsidiary (HKFRS 3 explains how to account for any related goodwill) Eliminate in full intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between entities of the group (profits or losses resulting from intragroup transactions that are recognised in assets, such as inventory and fixed assets, are eliminated in full)
Date of Commencement and Cessation of Consolidation [HKFRS 10 para 88]	This is particularly relevant for income and expense of subsidiary. Commencement: The date when control is obtained Cessation: The date when control is lost
Uniform Accounting Policies [HKFRS 10 para B87]	If the subsidiary uses accounting policies that differ from those of the parent, the subsidiary's F/S should be adjusted to reflect the parent's accounting policies for the purpose of consolidation.
Different Year End [HKFRS 10 para B92 & B93]	For consolidation, the parent should use the F/S of the subsidiary as of the <u>same date</u> as the F/S of the parent unless it is impracticable to do so. If it is <u>impracticable</u> , the <u>most recent available F/S</u> of the subsidiary should be used, with <u>adjustments</u> made for the effects of any significant transactions or events occurring between the accounting period ends. However, the difference between the reporting date of the subsidiary and that of the parent <u>cannot be longer than three months</u> .

Non-Controlling	Financial Position:
Interests	NCI should be presented within equity (separately from the
("NCI")	equity of the owners of the parent).
[HKFRS 10 para	Total Comprehensive Income:
22 & B94]	 The entity should attribute the profit or loss and each
	component of OCI to the owners of the parent and to NCI.

For detailed consolidation journals, please see Section 9.5.

9.1.3 Consolidation Exemptions

There are circumstances where the reporting entity is exempted for preparing consolidated F/S:

Circumstance	Remarks
General	A parent (as reporting entity) need not present consolidated F/S if
	it meets all of the following conditions:
[HKFRS 10	 it is a <u>wholly-owned subsidiary</u> or is a partially-owned
para 4(a)]	subsidiary of another entity and its other owners, including
	those not otherwise entitled to vote, have been informed
	about, and do not object to, the parent not presenting
	consolidated F/S
	• its debt or equity instruments are not traded in a public market
	 it <u>did not file</u>, nor is it in the process of filing, its F/S with a
	securities commission or other regulatory organisation for the
	purpose of issuing any class of instruments in a public market
	its ultimate or any intermediate parent produces consolidated
	F/S that are available for public use and comply with HKFRS
	or IFRS

НКГА
LEARNINGMEDIA

Investment	An investment entity is an entity that:
Entities	• <u>obtains funds</u> from one or more investors for the purpose of
	providing those investor(s) with investment management
[HKFRS 10	services;
para 27, 30-33]	• <u>commits to its investor(s)</u> that its business purpose is to invest
	funds solely for returns from capital appreciation, investment
	income, or both; and
	measures and evaluates the performance of substantially all
	of its investments on a FV basis.
	[Arguably, the above typically applies to an investment fund.]
	An entity is required to consider all facts and circumstances when
	assessing whether it is an investment entity.
	In nutshell, if the parent (as reporting entity) is an investment
	entity:
	It should not consolidate its subsidiaries.
	Instead, the investment in subsidiaries should be measured
	at FV thought profit or loss in accordance with HKFRS 9.
	However, an investment entity is still required to consolidate a
	subsidiary where that subsidiary provides services that relate
	to the investment entity's investment activities.
	A parent that either ceases to be an investment entity or becomes
	an investment entity shall account for the change in its status
	prospectively from the date at which the change in status
	occurred.
	It should be noted that the above exemption only applies to the
	investment entity itself. Accordingly, the parent of an investment
	entity is required to consolidate all entities that it controls,
	including those controlled through an investment entity subsidiary,
	unless the parent itself is an investment entity.

9.2 Basics of Business Combinations

Reference: HKFRS 3 (Revised) *Business Combinations* (Revised February 2012)

- applicable for annual periods beginning on or after 1 January 2009
- earlier application is encouraged

Once control is established, the subsidiary should be consolidated by the controlling party (i.e. the acquirer). The transaction or other event in which an acquirer obtains control of one or more businesses is known as business combination.

HKFRS 3 establishes principles and requirements for how the acquirer:

- recognises and measures in its F/S the <u>identifiable assets acquired</u>, the <u>liabilities assumed</u> and any NCI in the acquiree
- recognises and measures the <u>goodwill</u> acquired in the business combination or a gain from a bargain purchase
- determines what information to <u>disclose</u> to enable users of F/S to evaluate the nature and financial effects of the business combination

HKFRS 3 must be applied when accounting for business combinations, but does not apply to:

- The formation of a joint venture
- The acquisition of an asset or group of assets that is not a business, although general guidance is provided on how such transactions should be accounted for
- Combinations of entities or businesses under common control (see Section 9.8)
- Acquisitions by an investment entity of a subsidiary that is required to be measured at FV through profit or loss under HKFRS 10

9.2.1 Determining whether a transaction is a business combination

HKFRS 3 provides additional guidance on determining whether a transaction meets the definition of a business combination:

Aspects	Remarks		
How Business	Business combinations can occur in various ways, for example:		
Combinations	 by transferring cash 		
may take place	 by incurring liabilities 		
	 by issuing equity instruments 		
	 by not issuing consideration at all (i.e. by contract alone) 		

5	2)
	ン
J.	

	MA Chapter 9 (HKFRS 3 (Revised), HKFRS 10, HKFRS 11, HKAS 28, HKFRS 12, HKAS 7, HKAS21)
[HKFRS 3 para	Business combinations can be structured in various ways to
B5 & B6]	satisfy legal, taxation or other objectives, including:
	 one entity becoming a subsidiary of another
	 the transfer of net assets from one entity to another or to a
	new entity
Elements of a	As its name suggests, a business combination must involve the
Business	acquisition of a business. There is a question as to whether an
	entity has acquired a business (i.e. business combination) or
[HKFRS 3 para	merely a group of assets (i.e. asset acquisition).
B7	
	Arguably most transactions may be obvious business combinations
	(e.g. the acquisition of a major multinational business) or asset

assessment can be complex and judgmental in some other cases. A business is defined as "an integrated set of activities and assets that is capable of being conducted and managed for the purpose of providing a return (in the form of dividends, lower costs or other economic benefits) directly to investors or other owners, members or participants." In simple terms, a business consists of inputs and processes applied to those inputs that have the ability to create outputs.

transactions (e.g. the purchase of an equipment). However, the

As such, there are three elements:

- Inputs: an economic resource (e.g. non-current assets, intellectual property) that creates outputs when one or more processes are applied to it
- **Process**: a system, standard, protocol, convention or rule that when applied to an input or inputs, creates outputs (e.g. strategic management, operational processes, resource management)
- **Output:** the result of inputs and processes applied to those inputs.

Although businesses usually have outputs (e.g. revenue or saleable products or services), outputs are not required for an integrated set to qualify as a business (e.g. a business still in development stage). However, inputs and processes must be present.

9.2.2 Acquisition Accounting for Business Combinations

HKFRS 3 [para 4] requires that the <u>acquisition method</u> should be used for all business combinations.

Furthermore, HKFRS 3 [para 3.5] specifies the following steps in applying the acquisition method:

- 1. Identification of the 'acquirer'
- 2. Determination of the 'acquisition date'
- 3. Recognition and measurement of the identifiable assets acquired, the liabilities assumed and any NCI in the acquiree

4. Recognition and measurement of goodwill or a gain from a bargain purchase Each step above is further discussed in below table:

•	

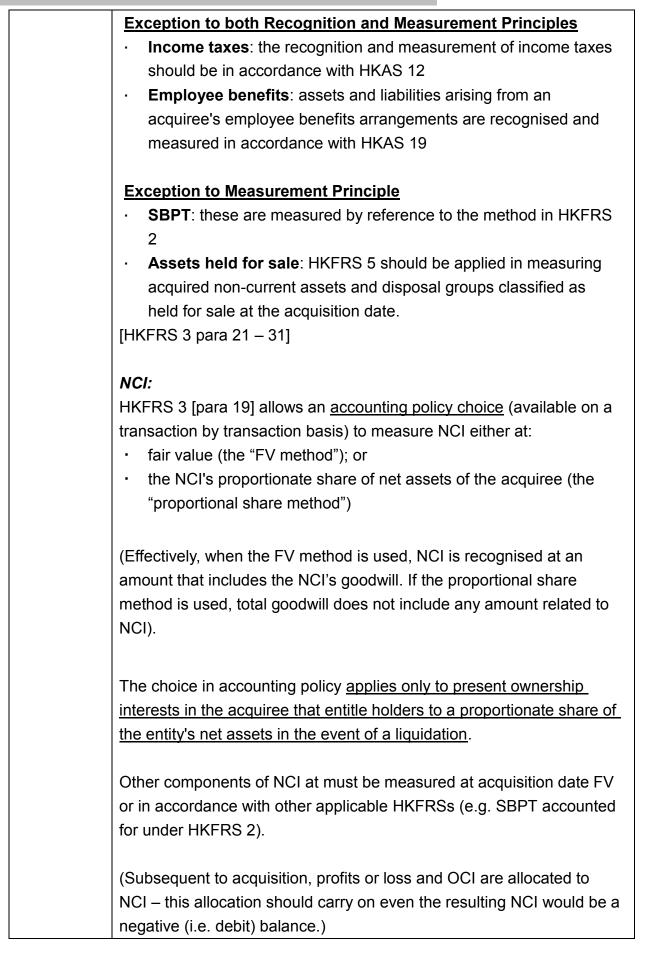

Step	Remarks
Step 1:	The entity should refer to the guidance in HKFRS 10 in identify an
Acquirer	acquirer in a business combination, i.e. the entity that obtains 'control' of
	the acquiree.
[HKFRS 3	
para 7,	If the guidance in HKFRS 10 does not clearly indicate which of the
B14-17]	combining entities is an acquirer, HKFRS 3 provides additional
	guidance as follows:
	 The acquirer is usually the entity that transfers cash or other
	assets where the business combination is effected in this manner.
	 The acquirer is usually (but not always) the entity issuing equity
	interests. The entity also considers other pertinent facts and
	circumstances including:
	relative voting rights in the combined entity after the business
	combination
	the existence of any large minority interest if no other owner or
	group of owners has a significant voting interest
	the composition of the governing body and senior management
	of the combined entity
	the terms on which equity interests are exchanged
	 The acquirer is usually the entity with the largest relative size
	(assets, revenues or profit)
	 For business combinations involving multiple entities,
	consideration is given to the entity initiating the combination, and
	the relative sizes of the combining entities.

HKCA LearningM	MA Chapter 9 (HKFRS 3 (Revised), HKFRS 10, HKFRS 11, HKAS 28, 12, HKAS 7, HKAS21)	HKFRS
Step 2: Acquisition Date [HKFRS 3 para 8 & 9]	The acquirer should consider all pertinent facts and circumstances when determining the acquisition date (i.e. <u>the date on which it obtains</u> <u>control of the acquiree</u>). The date on which the acquirer obtains control of the acquiree is generally <u>the date on which the acquirer legally transfers the</u> <u>consideration, acquires the assets and assumes the liabilities of the</u> <u>acquiree</u> (known as the closing date). The acquisition date may be a date that is earlier or later than the	
Step 3: Identifiable Assets and Liabilities and NCI	 closing date. Acquired assets and liabilities: HKFRS 3 establishes the following principles in relation to the recognition and measurement of items arising in a business combination: Recognition principle: Identifiable assets acquired, liabilities assumed, and NCI in the acquiree, are recognised separately from goodwill [HKFRS 3 para 10] Measurement principle: All assets acquired and liabilities assumed in a business combination are measured at acquisition-date FV (commonly known as Purchase Price Allocation). [HKFRS 3 para 18] 	MA@HKC
	 Intangibles: An intangible asset is identifiable if it meets either: the separability criterion (capable of being separated or divided from the acquiree and sold, transferred, licensed, rented or exchanged); or the contractual-legal criterion (even if the asset is not transferable or separable from the acquiree). Please also refer to Chapter 3.2.2. Exceptions to the Recognition and Measurement Principles: The following items are exceptions. 	Aexam

Exception to Recognition Principle

Contingent liabilities: the requirements of HKAS 37 do not apply to the recognition of contingent liabilities arising in a business combination

MA Chapter 9 (HKFRS 3 (Revised), HKFRS 10, HKFRS 11, HKAS 28, HKFRS

Encouvery, and represents the uncrease between what a	le dequiter flae		
paid and obtained. If the acquirer paid more than what is obtained, this			
would be a goodwill, and vice versa as gain from a bargain purchase.			
Goodwill:			
Goodwill is measured as the difference between:			
the aggregate of:			
(i) the value of the consideration transferred (generation)	ally at FV),		
(ii) the amount of any NCI, and			
(iii) in a business combination achieved in stages (se	e Sections 9.6		
& 9.7), the acquisition-date FV of the acquirer's p	previously-held		
	y		
acquired and the liabilities assumed (measured in accordance with			
[HKFRS 3 para 32]			
Typically, goodwill can be computed by:

9.2.3 Other Issues in Business Combinations

Having establishing the basic principles of business combination in the previous section, this section deals with some specific considerations under HKFRS 3.

Aspects	Remarks	
Acquisition-related	Acquisition-related costs are costs the acquirer incurs to effect a	
Costs	business combination. They may include:	
	finder's fees	
[HKFRS 3 para 53]	 advisory, legal, accounting, valuation and other professional or consulting fees 	
	 general administrative costs (e.g. costs of maintaining an internal acquisitions department) 	
	 costs of registering and issuing debt and equity securities 	
	Costs of issuing debt or equity instruments are accounted for under HKAS 32 and HKFRS 9.	
Expenses	All other costs associated with an acquisition must be expensed in the periods in which the costs are incurred and the services are received.	
Contingent	Contingent liabilities are recognised (and included in goodwill)	
Liabilities	for those that are a presentation obligation and can be measured reliably.	
[HKFRS 3 para 56]	(Note: this is in contrast to recognition by HKAS 37)	
_	Until a contingent liability is settled, cancelled or expired,	
	contingent liability is measured at the higher of:	
	 the amount the liability would be recognised 	
	under HKAS 37; and	
	 the amount initially recognised less (if appropriate) 	
	cumulative amortisation recognised in accordance with HKAS 18.	

	The measurement period is the <u>period after the acquisition date</u> during which the acquirer <u>may adjust the provisional amounts</u> recognised for a business combination.
	The measurement period <u>cannot exceed one year from the</u> <u>acquisition date</u> and no adjustments are permitted after one year except to correct an error in accordance with HKAS 8.
	Adjustments to provisional amounts, and the recognition of newly identified asset and liabilities, must be made within the 'measurement period' where they <u>reflect new information obtained</u> <u>about facts and circumstances that were in existence at the acquisition date</u> .
	During the measurement period, the acquirer should retrospectively adjust the provisional amounts recognised at the acquisition date to reflect new information obtained about facts and circumstances that existed as of the acquisition date and, if known, would have affected the measurement of the amounts recognised as of that date.
Reverse Acquisitions	A reverse acquisition occurs when the entity that issues securities (the 'legal acquirer') is identified as the acquiree.
[HKFRS 3 para B19]	The entity whose equity interests are acquired (the 'legal acquiree') must be the acquirer for accounting purposes for the transaction to be considered a reverse acquisition.
	For example, reverse acquisitions sometimes occur when a private operating entity wants to become a public entity but does not want to register its equity shares. To accomplish that, the private entity will arrange for a public entity to acquire its equity interests in exchange for the equity interests of the public entity.
	In this example, the public entity is the legal acquirer because it issued its equity interests, and the private entity is the legal acquiree because its equity interests were acquire. But for accounting purpose:
	 the public entity as the acquiree for accounting purposes (the 'accounting acquiree') the private entity as the acquirer for accounting purposes (the
	'accounting acquirer') The accounting acquiree must meet the definition of a business for the transaction to be accounted for as a reverse acquisition, and all of the recognition and measurement principles of HKFRS 3 (including the requirement to recognise goodwill) apply.

9.4 Basics of Associates

Reference: HKAS 28 (2011) Investments in Associates and Joint Ventures

- applicable for annual periods beginning on or after 1 January 2013
- earlier application is encouraged

HKAS 28 was reissued following the issuance of HKFRS 11. HKAS 28 prescribes:

- the accounting for investments in associates; and
- the requirements for the application of the equity method when accounting for investments in associates and joint ventures.

HKAS 28 should be applied by all entities that are investors with joint control of, or significant influence over, an investee.

MA Chapter 9 (HKFRS 3 (Revised), HKFRS 10, HKFRS 11, HKAS 28, HKFRS 12, HKAS 7, HKAS21)

Definition:

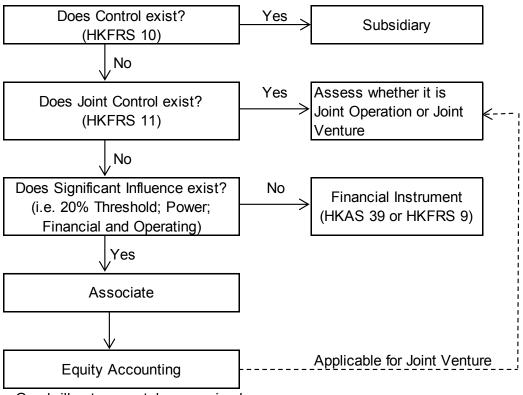

An **associate** is an entity over which the investor has significant influence.

Investment in associate or joint venture should be <u>classified as non-current asset</u> unless the investment is classified as held for sale in accordance with HKFRS 5. [HKAS 28 para 15]

The mindmap of HKAS 28 is as follows:

Mindmap of HKAS 28

- Goodwill not separately recognised

- Share of loss limited to interest ; Subsequent profit shared to the extent loss not recognised

- Impairment as single asset (no internal allocation)

- Exemption (mandatory or optional)

9.4.1 Significant Influence

Significant influence is an important concept because it drives the classification of an associate and thus the accounting. The below table summarises the key points for assessing significant influence:

Ĺ

Aspects	Remarks		
Definition	Significant influence is the power to participate in the financial and		
	operating policy decisions of the investee but is not control or joint		
	control of those policies.		
	The existence of significant influence is usually evidenced in one or		
	more of the following ways:		
	 representation on the board of directors or equivalent 		
	governing body of the investee		
	 participation in policy-making processes, including 		
	participation in decisions about dividends or other distributions		
	 material transactions between the entity and its investee 		
	 interchange of managerial personnel 		
	 provision of essential technical information 		
Assessing	HKAS 28 draws a 20% threshold to assess whether "power to		
whether	participate" (i.e. significant influence) exists.		
Significant			
Influence	If an entity holds, directly or indirectly (e.g. through subsidiaries),		
exists	20% or more of the voting power of the investee, it is presumed		
("20%	that the entity has significant influence, unless it can be clearly		
threshold")	demonstrated that this is not the case.		
[HKAS 28 para	Conversely, if the entity holds, directly or indirectly (e.g. through		
5]	subsidiaries), less than 20% of the voting power of the investee, it		
	is presumed that the entity does not have significant influence,		
	unless such influence can be clearly demonstrated.		
	A substantial or majority ownership by another investor does not		
	necessarily preclude an entity from having significant influence.		
Potential	The existence and effect of potential voting rights that are currently		
Voting Rights	exercisable or convertible, including potential voting rights held by		
	other entities, are considered when assessing whether an entity		
[HKAS 28 para	has significant influence.		
7 & 8]			

All facts and circumstances should be examined. However, the
intentions of management and the financial ability to exercise or
convert those potential rights are not considered.
What does it mean by "currently exercisable or convertible"?
Potential voting rights are <u>not</u> currently exercisable or convertible
when they cannot be exercised or converted until a future date or
until the occurrence of a future event.

9.4.2 Equity Method (applicable to both Associate and Joint Venture)

An investment is accounted for using the equity method from the date on which it becomes an associate or a joint venture. Below are the key points to note for equity accounting:

L
L

EARNINGMEDIA

Aspects	Remarks	
Principle of Equity Method	 On initial recognition the investment in an associate or a joint venture is recognised at cost The carrying amount is increased or decreased to recognise 	
[HKAS 28 para 10]	the investor's share of the profit or loss of the investee after the date of acquisition.3. The investor's share of the investee's profit or loss is	
	recognised in the investor's profit or loss.	
	 Distributions received from an investee reduce the carrying amount of the investment. 	
	 Adjustments to the carrying amount may also be necessary for changes in the investor's proportionate interest in the investee arising from changes in the investee's OCI (e.g. revaluation of PPE). 	
	(Note: The figures for calculating investor's share are from the F/S of the associate or joint venture – this applies even if those F/S are themselves consolidated F/S.)	
	See below example for illustration.	
% to apply	When potential voting rights exist, the entity's interest in an associate or a joint venture is determined solely on the basis of	
[HKAS 28 para 12 & 13]	existing ownership interests.	

	In other words, the entity's interest does not reflect the possible exercise or conversion of potential voting rights, <u>unless</u> the entity has, in substance, an existing ownership as a result of a transaction that currently gives it access to the returns associated with an ownership interest.
	In such circumstances, the proportion allocated to the entity is determined by taking into account the eventual exercise of those potential voting rights and other derivative instruments that currently give the entity access to the returns.
Accounting Policies	If the associate or joint venture uses accounting policies that differ from those of the investor, the associate or joint venture's F/S should be adjusted to reflect the investor's accounting policies for the purpose of applying the equity method.
Different Year End	In applying the equity method, the investor should use the F/S of the associate or joint venture as of the <u>same date</u> as the F/S of the investor unless it is impracticable to do so.
	If it is <u>impracticable</u> , the <u>most recent available F/S</u> of the associate or joint venture should be used, with <u>adjustments</u> made for the effects of any significant transactions or events occurring between the accounting period ends.
	However, the difference between the reporting date of the associate and that of the investor <u>cannot be longer than three</u> <u>months</u> .
	On acquisition of the investment, any <u>difference between the cost</u> of the investment and the entity's share of the net FV of the investee's identifiable assets and liabilities is accounted for as
32]	 follows: (Cost > Net FV): Goodwill relating to an associate or a joint venture is <u>included in the carrying amount</u> of the investment. Amortisation of that goodwill is not permitted. (Net FV > Cost): Any excess of the entity's share of the net FV of the investee's identifiable assets and liabilities over the cost of the investment is <u>included as income</u> in the determination of
	the entity's share of the associate or joint venture's profit or loss in the period in which the investment is acquired.

MA Chapter 9 (HKFRS 3 (Revised), HKFRS 10, HKFRS 11, HKAS 28, HKFRS 12, HKAS 7, HKAS21)

	However, it is necessary to make appropriate adjustments to the
	entity's share of profit or loss after acquisition in order to account
	for any subsequent items due to FV exercise at acquisition date.
	For example, depreciation of the depreciable assets based on their
	FV at the acquisition date; goodwill impairment)
Sharing of	Recall that equity accounting involves sharing of the investee's
Loss	profit or loss.
[HKAS 28 para	If the entity's share of losses of an associate or a joint venture
38 & 39]	equals or exceeds its interest in the associate or joint venture, the
-	entity should <u>discontinue</u> recognising its share of further losses.
	After the entity's interest is reduced to zero, additional losses are
	provided for (as a liability) only to the extent that the entity has
	incurred legal or constructive obligations or made payments on
	behalf of the associate or joint venture.
	,
	If the associate or joint venture <u>subsequently reports profits</u> , the
	entity <u>resumes</u> recognising its share of those profits <u>only after</u> its
	share of the profits equals the share of losses not recognised.
Impairment	Impairment Assessment when Share of Loss:
	 Apply HKAS 39 to determine whether it is necessary to
[HKAS 28 para	recognise any additional impairment loss with respect to its net
40 – 43]	investment in the associate or joint venture.
-	
	If Impairment is Indicated:
	The amount is calculated by reference to HKAS 36 (i.e.
	comparing carrying amount with recoverable amount)
	• The entire carrying amount of the investment is tested for
	impairment as a single asset. (i.e. goodwill is not tested
	separately)
	 The recoverable amount of the investment is assessed for
	each individual associate or joint venture (unless the associate
	or joint venture does not generate cash flows independently)
	 Any impairment loss is <u>not allocated</u> to any assets (including
	goodwill) that form part of the investment

22]	22]	

Example – Principle of Equity Method

Entity A acquired a 20% interest in entity B for HK\$300,000. Entity B is the associate of Entity A.

At the acquisition date, Entity B has net assets of HK\$500,000. The FV of those net assets is HK\$600,000 as the FV of PPE is HK\$100,000 higher than its book value. The remaining useful life of that PPE is 10 years.

Financial data of Entity B:

- Profit after tax of HK\$120,000
- Paid a dividend out of these profits of HK\$8,000
- Exchange losses of HK\$50,000 directly in OCI

MA Chapter 9 (HKFRS 3 (Revised), HKFRS 10, HKFRS 11, HKAS 28, HKFRS 12, HKAS 7, HKAS21)

In other words, the closing net asset of Entity B is:

<u>Net Assets</u>

	HK\$	
Opening	500,000	
Profits	120,000	
Dividends	(8,000)	
Fx Loss	(50,000)	
Closing	562,000	

Applying Equity Method		
	HK\$	
Cost of Investment	300,000	Including goodwill of HK\$180,000
Share of Profit	24,000	= (20% x HK\$120,000)
Share of OCI	(10,000)	= (20% x HK\$50,000)
Share of Additional Depreciation due to FV uplift	(2,000)	= (20% x HK\$10,000)
Elimination of Dividend	(1,600)	= (20% x HK\$8,000)
Carryng Amount of Investment in Entity B	310,400	
Reconciliation by "Balance Sheet" Approach		
	HK\$	
Share of Net Assets	112,400	= (20% x HK\$562,000)
Goodwill	180,000	= (HK\$300,000 - 20% x HK\$600,000)
Share of FV adjustments	18,000	= (20% x HK\$90,000) ; Note 1
Carryng Amount of Investment in Entity B	310,400	

Note 1: The initial FV difference of HK\$100,000 has been reduced by HK\$10,000 due to depreciation in the year. (i.e. share of "additional" asset)

9.5 Preparation of Consolidated Balance Sheet and Income Statement

Needless to say, this is the most common examinable area you would expect to see in any financial reporting exams. While the setting or style may vary among different questions, below are some useful reminders:

- Pay attention to acquisition dates and dates of data given.
- Include subsidiaries in consolidation worksheet only
- The question may or may not be required to consider deferred tax implications.
- You may need to incorporate journal entries in other parts of the question.
- FV of net assets acquired may be given in the question in the following ways:
 - Share Capital + Retained Earnings with no FV adjustment
 - In purchase price allocation lead schedule
- Dividends from subsidiaries is usually hidden in income statement given (rather than in narratives)

- For intra-group transactions (e.g. inventory or PPE), note carefully:
 - > whether prior years or current year
 - whether upstream or downstream
- · Always use further schedule to calculate NCI's share of profit or loss
- Both profit or loss and OCI should be allocated to NCI

It is virtually not possible to list all the consolidation adjustments. In fact, the adjustments should be tailored to specific circumstances. Nevertheless, some commonly applicable entries are listed below which would prove to be useful by adopting the following steps:

General:

- 1. Draw the Group Chart.
- 2. Highlight the Acquisition Date(s).
- 3. Copy and paste the individual balance sheets or income statements of the parent and subsidiaries (no need for associates) to the consolidation worksheet.

Subsidiaries:

- 4. Calculate Goodwill.
- 5. Determine any Deferred Tax implication on FV Differences (if required).
- 6. Calculate any Impairment Loss and additional Depreciation or Amortisation due to Goodwill allocation.
- 7. Allocate Post-Acquisition Profit or Loss and OCI to NCI.
- 8. Eliminate Intra-Group Transactions (e.g. Dividend, Upward or Downward Transactions).
- 9. Determine any Deferred Tax implication on Intra-Group Transactions.
- 10. Allocate Current Year's Profit and OCI to NCI.

Associates:

- 11. Create a new FSLI in Conso P/L "Share of Associate's Profit".
- 12. Calculate the share of profit using holding %.
- 13. Eliminate Intra-Group Transactions (e.g. Dividend, Upward or Downward Transactions).

Consolidation Adjustments for Subsidiaries

Accounting for Acquisiton Date and related mat	ters					
#CJ1 - Elimination of Share Capital						
If Direct Holding:						
	HK\$	HK\$	Remarks			
Dr Share Capital (B/S)	X		Always 100% of subsidiaries' Share Capital			
Dr Pre-Acq Retained Earnings (B/S)	v		Always 100% of subsidiaries' Pre-Acquisition Profit (Dr) or			
Di Pie-Acq Retained Earnings (B/S)	Х		Loss (Cr).			
Dr (Any FV difference)	х		If given in the Q

MA Chapter 9 (HKFRS 3 (Revised), HKFRS 10, HKFRS 11, HKAS 28, HKFRS 12, HKAS 7, HKAS21)

9.10 Separate Financial Statements

Reference: HKAS 27 (2011) *Separate Financial Statements* (Revised December 2012)

- applicable for annual periods beginning on or after 1 January 2013
- earlier application is encouraged

HKAS 27 was reissued following the issuance of HKFRS 10. The nature of change is apparent from the change in title from "Consolidated Financial Statements" to "Separate Financial Statements". Requirements on consolidation exemption are also moved to HKFRS 10.

With the requirements on control now addressed by HKFRS 10, HKAS 27 prescribes the <u>accounting and disclosure requirements for investments in</u> <u>subsidiaries, joint ventures and associates</u> when the entity prepares <u>separate</u> <u>F/S</u>.

A Hong Kong company is required by HKCO to present separate balance sheet (see Chapter 1.1).

Clarification of the concept about "separate F/S":

- Separate F/S are those presented by:
 - > a parent (i.e. an investor with control of a subsidiary); or
 - an investor with joint control of, or significant influence over, an investee, in which the investments are accounted for at cost or in accordance with HKFRS 9.
- · Accordingly, F/S in which the equity method is applied are not separate F/S.
- Similarly, F/S of an entity that does not have a subsidiary, associate or joint venturer's interest in a joint venture are not separate F/S.

HKAS 27 sets out the below requirements:

Aspects	Remarks
Choice of Accounting	In the separate F/S, investments in subsidiaries, joint
Method	ventures and associates should be accounted for either:
	(a) at cost, or
[HKAS 27 para 10]	(b) in accordance with HKFRS 9.
	[Note: Effective from annual periods beginning on or after 1
	January 2016 (early adoption is permitted), equity method
	is also allowed.]
Dividend from	Dividend should be recognised in profit or loss in separate
Subsidiary, Joint Venture or Associate	F/S when the right to receive the dividend is established.
	[Note: If Equity Method is used then the dividend should be
[HKAS 27 para 12]	recognised as a reduction from the carrying amount of the investment.]
Investment Entities	(Note: The investment entity consolidation exemption
	below is covered in HKFRS 10 which is effective for annual
	periods beginning on or after 1 January 2014.)
	Under HKFRS 10, an investment entity is required to apply
	the exception to consolidation.
	If a parent (as investment entity) is required to measure its
	investment in a subsidiary at FV through profit or loss under
	HKFRS 10, it is required to also account for its investment in
	a subsidiary in the same way in its separate F/S.
	[HKAS 27 para 11A]

HKLA LearningMedia	MA Chapter 9 (HKFRS 3 (Revised), HKFRS 10, HKFRS 11, HKAS 2 12, HKAS 7, HKAS21)	28, HKFRS
	When a parent ceases to be an investment entity:	
	 account for an investment in a subsidiary: 	
	 at cost (based on FV at the date of change or status); 	
	or	
	in accordance with HKFRS 9.	
	When an entity becomes an investment entity:	
	• account for an investment in a subsidiary at FV through	
	profit or loss in accordance with HKFRS 9.	
	[HKAS 27 para 11B]	
	Note: Effective from annual periods beginning on or after 1	
	January 2016 (early adoption is permitted):-	
	• When an entity ceases to be an investment entity, the	_
	entity shall account for an investment in a subsidiary in	
	accordance with para 10 above.	
	The date of the change of status shall be the deemed	MA@
	acquisition date. The FV of the subsidiary at the	(2)
	deemed acquisition date shall represent the	
	transferred deemed consideration when accounting for	
	the investment in accordance with para 10 above.	

Group Accounting and Business Combinations

Extract from QP MA Sept 08 Q2b

Question 2 (10 marks – approximately 18 minutes)

Discuss the following statements:

(b) "It is an option for an entity with an investment in a subsidiary not to prepare consolidated financial statements."

(5 marks)

Answer to QP MA Sept 08 Q2b

Answer 2(b)

The statement is incorrect.

Under HKAS 27, parents should prepare consolidated financial statements in which they consolidate their investments in subsidiaries subject to one exception when ALL of the following conditions set out in HKAS 27.10 are met:

- (a) the parent is itself a wholly-owned subsidiary, or the parent is a partially-owned subsidiary of another entity and its other owners, including those not otherwise entitled to vote, have been informed about, and do not object to, the parent not preparing consolidated financial statements;
- (b) the parent's debt or equity instruments are not traded in a public market (a domestic or foreign stock exchange or an over-the-counter market, including local and regional markets);
- (c) the parent did not file, nor is it in the process of filing, its financial statements with a securities commission or other regulatory organisation for the purpose of issuing any class of instruments in a public market; and
- (d) the ultimate or any intermediate parent of the parent produces consolidated financial statements available for public use that comply with Hong Kong Financial Reporting Standards or International Financial Reporting Standards.

If on acquisition of a subsidiary meets the criteria to be classified as held for sale in accordance with HKFRS 5, it shall be accounted for in accordance with that standard.

Extract from QP MA Sept 08 Q5b

Question 5 (12 marks – approximately 22 minutes)

(b) "In a business combination, if the fair value of the identifiable assets and liabilities and contingent liabilities at the acquisition date can only be determined provisionally, the acquirer shall adjust such provisional value upon the finalisation of the fair value determination." Discuss.

(4 marks)

Answer to QP MA Sept 08 Q5b

Answer 5(b)

Under HKFRS 3.45 (Revised), adjustments to provisional values may be made within a period not exceed one year from the acquisition date and accounted for as if they were made at the acquisition date.

Therefore, the acquiree's net assets are calculated as if the adjusted fair value was recognised at the acquisition date.

Goodwill or any discount on acquisition recognised shall be adjusted from the acquisition date by an amount equal to the adjustments to the fair value at the acquisition date of the identifiable asset, liability or contingent liability being recognised or adjusted.

Comparative figures are restated accordingly.

Revisions of estimates identified after the twelve-month period are not adjusted retrospectively, but accounted for in the period in which they are identified.

After the measurement period ends, the acquirer shall revise the accounting for a business combination only to correct an error in accordance with HKAS 8 *Accounting Policies, Changes in Accounting Estimates and Errors.*

Extract from QP MA Feb 10 Q2b

Question 2 (10 marks – approximately 18 minutes)

(b) "No goodwill is recognised in the financial statements prepared under merger accounting for business combination under common control. However, goodwill can still appear in the consolidated financial statements after applying merger accounting for business combination under common control." Discuss.

(5 marks)

Answer to QP MA Feb 10 Q2b

Answer 2(b)

Goodwill can still be recognised in the financial statements prepared under merger accounting for a business combination under common control.

The concept underlying the use of merger accounting to account for a common control combination is that no acquisition has occurred and there has been a continuation of the risks and benefits to the controlling party (or parties) that existed prior to the combination.

The net assets of the combining entities or businesses are consolidated using the existing book value from the controlling parties' perspective.

The assets and liabilities of the acquired entity or business should be recorded at the book values as stated in the financial statements of the controlling party.

That is, it will require recording of:

- The fair value of the identifiable assets and liabilities of the acquired entity or business at the date of original acquisition from third parties by the controlling party.
- Any remaining goodwill arising on the previous acquisition and non-controlling interest recorded in the consolidated financial statements of the controlling party.

There is no recognition of any additional goodwill or excess of acquirer's interest in the net fair value of the acquiree's identifiable assets, liabilities and contingent liabilities over cost at the time of common control combination to the extent of the continuation of the controlling party or parties' interest.

Extract from QP MA Dec 10 Q3

Question 3 (16 marks – approximately 29 minutes)

On 1 October 2009, Smart Computer Limited (SCL) acquired an 80% interest in Breakthrough Disc Company (BDC) at a consideration of HK\$72 million. Fair value of BDC shares at that date was HK\$45 each.

The carrying amount of identifiable net assets of BDC reported on its statement of financial position at the date of acquisition was HK\$42 million. Other than the property, plant and equipment with carrying amount of HK\$60 million and fair value of HK\$76 million, there were no differences between the carrying amount and the fair value for all other reported assets and liabilities. An internally generated intangible asset with fair value of HK\$8 million was identified. Both the property, plant and equipment and the intangible asset have an estimated useful life of 10 years from the date of acquisition.

On 1 April 2010, SCL distributed 300,000 shares of BDC, represented 15% interest in BDC, to its shareholders ("the Distribution"). Fair value of the BDC share at that date was HK\$63 each. Post acquisition profit reported by BDC before adjustment of depreciation and amortisation attributable to fair value up to 1 April 2010 was HK\$8 million.

SCL has four shareholders with equal ownership and adopts the accounting policy to measure any non-controlling interests in the acquiree at fair value.

Required:

Assuming that BDC is not subject to income tax in any jurisdiction,

(a) calculate the amount of goodwill recognised for the acquisition.

(7 marks)

(b) calculate the amount of non-controlling interests in BDC as at 1 April 2010 before the Distribution to be reflected in the consolidated statement of financial position of SCL.

(5 marks)

(c) explain the accounting treatment and prepare the necessary consolidation adjustment journal(s) for the Distribution for the preparation of the consolidated financial statements of SCL.

(4 marks)

Answer to QP MA Dec 10 Q3

Answer 3(a)

The amount of goodwill is calculated as follows:

Consideration transferred: HK\$72 million

Amount of non-controlling interests: HK\$45 x 2,000,000 x 20% = HK\$18 million

Identifiable net assets of BDC acquired:

Net carrying amount in the books of BDC = HK\$42 million

Fair value adjustments:

Property, plant and equipment = HK\$76 - HK\$60 million = HK\$16 million Intangible asset = HK\$8 million

Net of the acquisition-date amounts of the identified assets acquired and the liabilities assumed = HK\$[42 + 16 + 8] million = HK\$66 million

Goodwill acquired = HK\$[72 + 18 - 66] million = HK\$24 million

Answer 3(b)

Non-controlling interests in BDC as at 1 April 2010 before the Distribution to be reflected in the consolidated statement of financial position of SCL:

Net of the acquisition-date amounts of the identified assets acquired and the liabilities assumed (as above) = HK\$66 million

Post acquisition profit reported by BDC before adjustment of depreciation and amortisation attributable to fair value up to 1 April 2010 = HK\$8 million

Additional depreciation for the period from 1 October 2009 to 31 March 2010: = HK\$16 million / 10 x 0.5 = HK\$0.8 million

Additional amortisation for the period from 1 October 2009 to 31 March 2010:

- = HK\$8 million / 10 x 0.5
- = HK\$0.4 million

Adjusted post acquisition profit of BDC incorporated into the consolidated financial statements of SCL up to 1 April 2010 = HK\$[8 – 0.8 – 0.4] million = HK\$6.8 million

Non-controlling interest of 20% = HK\$18 million + [HK\$6.8 million x 20%] = HK\$19.36 million

Answer 3(c)

According to paragraphs 30 and 31 of HKAS 27, changes in a parent's ownership interest in a subsidiary that do not result in a loss of control (i.e. still accounted for as a subsidiary) are accounted for as equity transactions (i.e. transactions with owners in their capacity as owners). In such circumstances the carrying amounts of the controlling and non-controlling interests shall be adjusted to reflect the changes in their relative interests in the subsidiary. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received shall be recognised directly in equity and attributed to the owners of the parent.

The journal entries to be recorded by SCL for the Distribution were:

Dr Dividend HK\$14,520,000 Cr Non-controlling interest HK\$14,520,000

(15/80 of the goodwill attributable to SCL and 15% of adjusted net assets of BDC incorporated into the consolidated financial statements of SCL as at 1 April 2010 = HK $[72 + (6.8 \times 80\%)]$ million x 15/80

[OR**

15% of total goodwill and adjusted net assets of BDC incorporated into the consolidated financial statements of SCL as at 1 April 2010 = HK\$(66 + 6.8 + 24) million x 15%])

HK(IFRIC) – Int 17 para. 7 states that in accordance with paragraph 5, this Interpretation does not apply when an entity distributes some of its ownership interests in a subsidiary but retains control of the subsidiary. The entity making a distribution that results in the entity recognising a non-controlling interest in its subsidiary accounts for the distribution in accordance with HKAS 27 (as amended in 2008).

Extract from QP MA Jun 15 Q4a-b

<u>Question 4</u> (16 marks – approximately 29 minutes)

On 15 May 2014, Apple Company Limited ("ACL"), a company listed on the Hong Kong Stock Exchange, has entered into an agreement to acquire 60,000 shares of Juice Manufacturing Limited ("JML"), representing a 60% interest in JML, at a consideration of HK\$30 million, which would be settled by cash of HK\$10 million and 20 million shares of ACL. As a contingent consideration, a further consideration to be settled by 4 million shares of ACL would be made if the profit of JML for the year ending 31 December 2015 exceeds HK\$15 million. Upon acquisition of the 60% interest in JML, JML has become a subsidiary of ACL. The principal activity of JML is the manufacture and sale of apple juice in Hong Kong.

The acquisition is subject to the shareholders' approval of ACL and the fulfilment of certain other substantive pre-conditions by ACL to obtain the control over JML. The shareholders' approval of ACL was obtained on 30 June 2014 while all the required conditions were satisfied on 15 August 2014.

The fair values of each of the shares of ACL on 15 May 2014, 30 June 2014 and 15 August 2014 are HK\$1.50, HK\$1.20 and HK\$1.40 respectively. The fair values of each of the share of JML on 15 May 2014, 30 June 2014 and 15 August 2014 are HK\$500, HK\$510 and HK\$515 respectively. The fair values of the contingent consideration on 15 May 2014, 30 June 2014 and 15 August 2014 are HK\$2 million, HK\$2.5 million and HK\$1.8 million respectively. The control premium is not considered for the purposes of fair value measurement.

There were no differences between the carrying amount and the fair value of all assets and liabilities of JML except for certain property, plant and equipment with carrying amount of HK\$36 million and fair value of HK\$40 million.

In addition, certain intangible assets were identified upon the acquisition of JML as follows:

- technologies with carrying amount of HK\$2 million and fair value of HK\$10 million;
- potential contracts from prospective new customers for a total contract sum of HK\$8 million; and
- existing customer's relationship with fair value of HK\$4 million.

Deferred tax impact of HK\$2 million was not recognised by JML due to initial recognition exemption. Direct transaction cost for advisory service of HK\$200,000 was incurred.

Required:

- (a) Advise as to the accounting implications of the contingent consideration in relation to the profit of JML at the date of acquisition and as at 31 December 2015. (4 marks)
- (b) Advise as to the accounting implications of the consideration transferred and calculate the relevant amount recognised for the acquisition.

(4 marks)

Answer to QP MA Jun 15 Q4a-b

Answer 4(a)

Contingent consideration is recognised as part of the consideration transferred for a business combination, measured at fair value at the date of acquisition.

As the number of shares that will ultimately be delivered by ACL does not vary (i.e. the only outcomes are nil or 4 million shares to be issued depending on the profit of JML), the contingent consideration meets the definition of equity instrument under HKAS 32 and would be classified as equity upon initial recognition.

As at 31 December 2015, if JML fails the profit target, no remeasurement is required and there will not be any impact on profit or loss. If JML fulfills the profit target, 4 million shares will be issued to the vendor which will be dealt within the equity.

Answer 4(b)

The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the acquisition-date fair values of the asset transferred, liabilities incurred and the equity interest issued by ACL according to paragraph 37 of HKFRS 3.

The acquisition date is defined as the date on which ACL obtains control over JML, i.e. 15 August 2014 on which all the conditions to obtain control were satisfied.

Thus, the consideration transferred by ACL is the aggregate value of cash of HK\$10 million, the fair value of its shares and the fair value of the contingent consideration at the date of acquisition, i.e. 15 August 2014.

Consideration transferred

- = HK\$10 million + [20 million x HK\$1.40] + HK\$1.8 million
- = HK\$39.8 million
