

# Cybersecurity Counter-offensive Asia Pacific Guide

What are the rules protecting data in Asia Pacific?  
What can you do to recover information if you have been hacked?

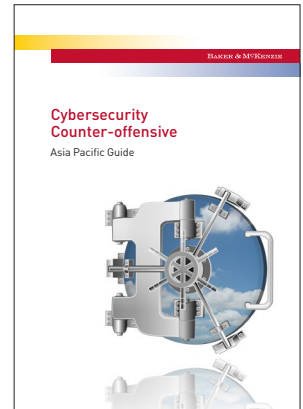

Baker & McKenzie's *The Cybersecurity Counter-offensive Asia Pacific Guide* has been launched in response to a wave of new cybersecurity legislation throughout the Asia Pacific region to regulate and monitor cybersecurity. Knowing the obligations in each jurisdiction and how each relevant regulator or court operates in practice is essential to navigating a response to a data breach incident and understanding which legal remedies may be available and which will be most effective.
