Title: Exchange rate regimes and macroeconomic management in Asia

Author: Tony Cavoli and Ramkishan S. Rajan

Publisher: Hong Kong : Hong Kong University Press

Year of Pub.: 2009

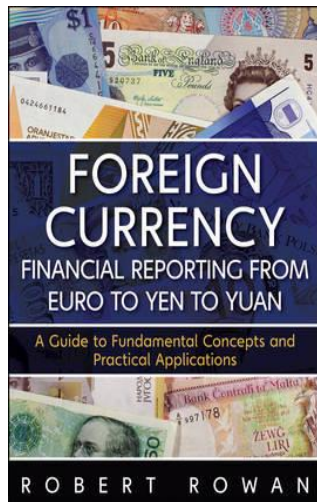

Call no.: HG3968 .C38 2009

ISBN.: 9789622090538

◆ Monetary issues in Asia have acquired great significance as the region holds the largest reserves in the world and consequently plays a major role in the global macro-economy. In addition, there are also a great variety of monetary policy regimes at play in the region. This volume explores monetary, exchange rate and macroeconomic policies in Asia. A particular question that is analyzed is Asia's experience since the crisis with the use of monetary policy to manage the resurgence in capital inflows. It also examines the theoretical and policy issues associated with international capital flows, the increasing degree of integration of financial markets and exchange rate regimes for emerging Asian economies.

◆ Chapters of the book include:

- Exchange rate regimes and monetary frameworks in Asia
- International capital flows, financial integration and macroeconomic management in Asia

Title: Foreign currency financial reporting from Euro to Yen to Yuan : a guide to fundamental concepts and practical applications

Author: Robert Rowan

Publisher: Hoboken, N.J. : John Wiley & Sons

Year of Pub.: 2011

Call no.: HG3853.7 .R69 2011

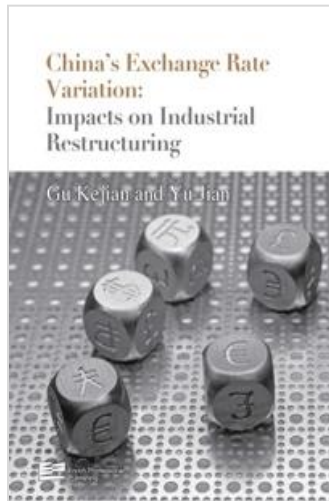

ISBN.: 9781118024423

◆ The book clarifies an intimidating topic into practical application to help you function effectively in the multicurrency reporting environment. The misperception that it's as simple as multiplying a value by an exchange rate is dispelled in this unique guide, providing the starting context for discussion of foreign currencies and exchange rates. Common points of confusion are addressed, without relying on technical jargon. Instead, you'll build a solid foundation in the background, history, and fundamental mechanics of foreign currency and exchange rates through a plain-English presentation of the basics

◆ Chapters of the book include:

- Isn't currency conversion just multiplication?
- Exchange rate tables: getting from Yen to Euro without losing your way
- Approximation: when mathematics, computer science, and regulations converge
- What's in a name?
- The gold standard: following the standard for fiat currencies
- They're not synonyms: transaction to translation, revaluation to remeasurement
- The intersection: interplay of mathematics, exchange rates, accounting standards, economics, and time
- Practical knowledge: things you should know
- Practical knowledge: things you can learn
- Cumulative translation adjustment

- The residual

Title: China's exchange rate variation : impacts on industrial restructuring

Author: Gu Kejian and Yu Jian

Publisher: Hong Kong : Enrich Professional

Year of Pub.: 2013

Call no.: HG3978 .G824 2013

ISBN.: 9789814298346

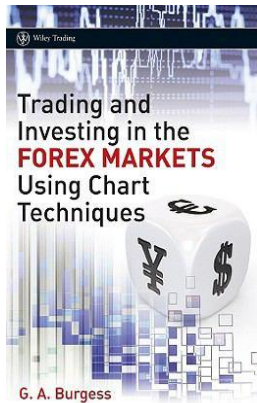

◆ This book analyzes the external influences, especially the influences of exchange rate variation, on China's current industrial restructuring under the development of open economy and globalization. It concludes that the key driving force for China's industrial restructuring is the development of its external sectors, such as the exchange rate mechanism and new strategies in the financial economy's capital market. The influences of the exchange rate variation, which is exerted through a unique mechanism, over China's industrial restructuring would be more obvious. This book also suggests that in order to keep improving the industrial structure, China should actively adjust the exchange rate of Renminbi and achieve dynamic comparative advantages.

◆ Chapters of the book include:

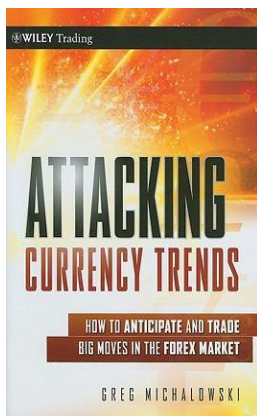

- Introduction: subject and methods
- Relevant theories of exchange rate variation and industrial restructuring
- China's industrial restructuring in the context of comparative advantage: exchange rate and gains from trade
- Introduction of development and openness variables
- Path analysis of changes in China's exchange rate leading to industrial restructuring
- Interdependence of China's exchange rate system reform and industrial restructuring
- China's exchange rate reform that meets the objectives of

industrial restructuring
